

B. S. in E. E.

EDWARD L. NELSON

A study of A. C. Networks with Variable Resistance.  
Networks Variable Resistance.

Born March 10, 1891, at Warsaw, Indiana.

Hyde Park High School, Chicago, '09.

Tau Beta Pi; Eta Kappa Nu; Y. M. C. A.; A. I. E. E.  
(Chairman).

Edward is said to be one of the few men in the class who let the fair sex alone, but as a man and a prospective engineer, he is near the top of the list. He is leader of the electricals in more ways than one, and well known around college as a student.

JOHN W. TURNER

Conversion of Elgin and Belvidere Railway from 600 to 1200 volt System.

Born June 10, 1893, at Sioux City, Iowa.

Armour Scientific Academy, '10.

Tau Beta Pi; Eta Kappa Nu; Sigma Kappa Delta; A. I. E. E.; Y. M. C. A. (Recording Secretary '12-'13, Department Secretary '13-'14).

John was a kid in short trousers when he entered college, but just look at him now, a member of three fraternities and "king" of the Y. M. C. A., which is certainly a man's job. With his enthusiasm and ability, he is sure to make good as an E. E.

ARTHUR F. SCHOEMBS

Electrification, Milwaukee Division, Chicago & North-Western Railway.

Born October 2, 1891, at Cairo, Illinois.

Cairo (Ill.) High School, '10.

Eta Kappa Nu; A. I. E. E. (Treasurer).

Schoembs is the financial pilot of the electricals. This downstater still carries some of his southern drawl, but there is nothing slow about him in other ways.

THOMAS CORNISH BOLTON

Conversion of the Elgin and Belvidere Railway from 600 to 1200 volt System.

Born January 22, 1892, at Sioux City, Iowa.

Sioux City (Ia.) High School, '10.

Delta Tau Delta; Eta Kappa Nu; Radical X; A. I. E. E. (Secretary); Armour Track '11.

Some men acquire fame in one thing, some in others. Bolton's reputation as terpsichorean expert and social devotee is firmly established.

FRANCISCO FERNANDEZ-MAREQUE

Electrification of the Milwaukee Division of the Chicago & Northwestern Railway.

Born January 21, 1887, at Asuncion, Paraguay.

Buenos Ayres National College, Buenos Ayres, Argentine Republic, A. B. '07.

Tau Beta Pi; Eta Kappa Nu; A. I. E. E.

We are quite used to having men come to Armour from all corners of the earth, but it is indeed a novelty to have a real nobleman with us. One only has to know Fernandez to believe the saying "Blood will tell."
