H. F. SMITH	Executive
WM. KANN	House
P. F. AUER	Smoker
W. H. HALLSTEIN	Banquet
E. G. ZACK	Initiation
S. P. WALKER	Pin

The Armour Civil Engineering Society was founded in the year 1906. The then Junior and Senior classes drew up the constitution which was adopted on June 14th of that year. A suite of rooms on the second floor of Chapin Hall was secured at this time, which has served as the Society's meeting place ever since. The pin adopted as the society badge is a unique design representing a levelling rod target. The present membership numbers forty-two men.

The object of the organization is to study and discuss the current problems confronting the Civil Engineer and also to establish a closer relationship between the two upper classes of the department. There have been many very interesting inspection trips made during the past year and plans are under way for several more trips. These trips are attended by all of the members of the society and are of great educational value to the students.
