President
Vice-President
Secretary
Treasurer

Seniors

W. C. GIELOW

E. J. HEPP

Juniors

S. W. ANDERSON
J. F. CHAMBERLIN

E. M. KRATZ

T. K. PFAFFLIN
W. H. RIETZ

Sophomores

F. T. BOWER
C. A. GRASSE

L. PETERSON
C. HILL

E. W. McDIARMID
S. ROSER

Since all the departments of the school except the Fire Protection Department had an organized club, the students and professors of this department thought it would be well to organize a "Fire Protection Engineering Society." The first meeting was called on November 11, 1913, and the subject of organization was discussed. After deciding to organize the society, the above named officers were elected. Two more business meetings followed, which were held on November 25 and December 9, 1913.

On January 27, 1914, Professor Taylor, head of the department, gave a fine illustrated lecture on the subject of "Automatic Sprinkler Systems and Fire Alarms." The meeting was held in the Physics lecture room and was well attended by men from the other departments as well as from our own department. Following this lecture, was another very practical and instructive lecture on February 24, 1914. The lecturer was Mr. W. H. Fredericks, and the subject discussed was "The Field Work of the Fire Prevention Committee of the National Board of Underwriters."

There is no doubt but that the society has only begun on its effective work along social and instructive lines, and a very successful year is looked forward to next year with the addition of the large number of freshmen who are taking the course.
