

The ELECTRIC STUDENT LAMP

—For Night Study

HERE is an electric lamp just suited for the night study, that every student must do. The Portable Electric Student Lamp should be on your desk or work table. With it eye-strain, frequently caused by wrongly directed light, may be prevented. This electric lamp is adjustable to any angle you may require. The full, mellow light is cast right on whatever work you may have in hand, while the eyes remain in the restful shadow.
