

JOSEPH M. BERNSTEIN

Born October 18, 1896, Chicago.

R. T. Crane Tech. High School.

Chemical Engineering.

A Study of Resorcinol Production.

Armour Institute Chemical Society.

Joe is one of those rare persons who knows how to work hard when they work and to play hard when they play. With his versatile disposition he is a regular all around man, Suffice it to say he is as conscientious socially as he is scholastically and as successful. A hard and consistent worker, he is never satisfied with any but the best results and his reports have been complete and exhaustive summaries of the subjects. All this joined with ambition to be the first of the foremost will add another name to the long line of successful Armour men. Good Luck! Joe—and may your progress be fast.

WM. S. EAGLE JR.

Born July 15, 1895, Chicago, Illinois.

Hyde Park High School.

Chemical Engineering.

Chemical Oxidation of O-Nitro
Toulene to O-Nitro Benzoic Acid.

Omega Lambda.

Tau Beta Pi.

Armour Chemical Society.

Golf Team, '16 and '20.

"Bill" is a rare combination of studiousness and quietness, coupled with a personality that lends charm. He is chary of speech, because he does not need to be otherwise—when he does speak, he makes it worth while. His constant cheerfulness and quiet, forceful personality will win him friends and success.

"Serene and resolute and still
and calm and self-possessed."
