

JOHN HENRY CLOUSE

Born April 22, 1888, Junction City, Ohio.

Junction City High School.

"A Proposed Design of Steam Laboratory for the Greater Armour Institute of Technology."

A.S.M.E.

Clouse is an old hand at mechanical engineering, having had some valuable practical experience. Then, too, he was once a professor (doesn't he look it). Finally he decided to go to school some more, with the result that we have enjoyed the addition of his quiet, patient, persevering personality.

CHARLES BUSHNELL DOOLITTLE

Born January 22, 1900, Chicago, Ill. Hyde Park High School.

"The Performance of a Harrington Forced Draft Chain Grate Stoker."

Σ. K. Δ.; A. S. M. E.

"Doo" has failed entirely to live up to Prof. Palmer's favorite interpretation of his surname. Quiet except to those who know him best, with ever ready good nature and a smile or joke for those around him, he has won himself a place in the hearts and thoughts of those with whom he comes in daily contact.
