

FRANK CHARLES DUENNES

Born May 10, 1898, Chicago, Ill.  
Oak Park and River Forest Township  
High Schools.

"A Proposed Design of the Steam  
Laboratory for the Greater Armour  
Institute of Technology."

T. B. II.; A. S. M. E.; Glee Club.

Frank is one of those quiet steady fellows whom you can always count on to do the right thing at the right time. He has made an excellent record and a host of friends while at Armour, and we know that whatever he does when he leaves college he will do well.

ARTHUR NEWBY GAIL

Born October 2, 1896.

Kenosha High School, Kenosha, Wis.

"The Representation of Automobile  
Engine Characteristics by Sur-  
faces."

Σ. K. Δ.; A. S. M. E.

Art hails from Kenosha, but we refuse to hold that against him. In fact after meeting the attractive young lady that he has brought to several of our school affairs from there, we are inclined to envy him. He is a conscientious worker and while he makes little fuss about it, he is always there with the results. We have all learned to know him as a true friend and he has never failed to help us out wherever he could.
