

ROBERT W. VAN VALZAH

Born August 29, 1898, Durand, Ill.
Englewood High School.

"A Proposed Design of the Refrigeration Laboratory for the Greater A. I. T."

T. B. II.; Σ . K. Δ .

A. S. M. E.; Jass Band; Treas. A. S. M. E.; 1st Marshall Junior Class; Interclass Baseball, '18; Interclass Basketball, '20, '21.

"Van" is the human counterpart of the turtle who ran the race with the hare. He may be a bit slow, but he always gets there.

He is one of those fellows who tackle their work in an earnest not-to-be-denied manner, and who play just as hard when it is time to play. Deliberate, steadfast, yet always ready for a frolic, "Van" is one man we are counting on to succeed.

CHARLES TAYLOR WALTER

Born January 4, 1899, Omaha, Neb.
University High School, Chicago.

"The Design of the Air Testing Laboratory for the Greater Armour Institute of Technology."

Δ . T. Δ .; T. B. II; Sphinx; Social Committee, 1917; Chairman Program Committee, 1921; Business Manager, 1920, "Cycle"; President A. S. M. E., 1920-21.

"Chick" works when he works and plays when he plays and can be relied upon to do equally well in both. He is a natural leader and one of our most active mechanicals, being interested in and a faithful supporter of all activities, ever ready with a good suggestion and a helping hand. His wide personal friendship, due to his pleasing personality and scholastic record is indicative of his standing at Armour.
