

SHELDON HAYWARD WEBSTER

Born October 16, 1892, Sioux Falls, S. D.

Washington High School, Sioux Falls, S. D.

"Test of a No. 300 DeLaval Oil Purifier and Clarifier."

Ω. Λ.; T. B. II.; A. S. M. E.; Junior Play; Cap and Gown Committee.

"Webbie" is easily the most conscientious of the Senior Mechanicals. The only "pony" he knows of is the kind they raise on the Shetland Islands. Yet "Webbie" is far, far away from being a "grind." His pleasant smile, his willingness to assist, and his many activities have made him one of the best liked men of "'21." We know that his determination and his honesty will "Carry on."

BRUNO EDWARD WOLGEMUTH

Born Oct. 1, 1896, Chicago, Ill.

Tilden High School.

"Efficiency and capacity tests of a Harrington Chain Grate Stoker."

T. B. II.; A. S. M. E.

Bruno is one of the older and more experienced men in the class. He entered Armour in 1915 but two years in the Great War as a lieutenant in the air service have delayed his graduation. He has seen service of another kind, too, for some four years ago he entered into a life partnership with the present Mrs. Wolgemuth.

One cannot say enough for this man, tho. Practical, aggressive, frank and of unfailing good humor, he has never been seen without his welcome smile. Even the trials and troubles of Theodore, his infant son, have failed to dishearten him. We're predicting a sunny future for this optimist.
