

FREDERICK BERNT ANDREW ANDERSON

Born March 21, 1899, Chicago, Ill.

Nicholas Senn High School.

"Industrial Lighting Survey of the City of Chicago."

Ω. Δ.; H. K. N.; A. I. E. E.; Glee Club, '21; Junior Play; Interclass Basketball, 1918-19-21 (Captain, '19); Varsity Baseball, 1921; Interclass Baseball, 1918-19 (Captain, '19); Class Athletic Representative, 1919.

"Andy" aside from being known as the class comedian is active in everything going on at the Institute. The way he took his part as "leading lady" in the class play will be long remembered. Those days held strenuous times for "Andy." If one can remember four years back they recall that he was a quiet unassuming chap, deeply engrossed in his studies and class athletics. Oh! how he has changed. He is now interested in anything of a social nature as well. His favorite greeting is, "Have you heard this one"?

LOUIS SIMON BLOOM

Born November 1, 1896, Russian Poland.

Tuley, 1915. Lewis Institute, 1917.

"Direct Reading Slip Meter for Induction Motors."

P. Δ. P.; A. I. E. E.; Radio Association.

If you ever want to know anything about electricity, ask Bloom, because if there is anybody who is an electrical shark, it's Bloom. He sometimes has Professor Freeman guessing when he starts to propound some new discovery or theory in electricity. Give him a chance and he will have Einstein guessing pretty soon.
