

HARRY CHARLES KIHLSSTROM

Born September 19, 1898, Chicago Heights, Illinois.

Englewood High School.

Design of a 20,000 K. V. A. Power Plant.

B. Φ.; A. I. E. E.

Harry is one of those quiet fellows who says little but does much. He has no special hobby, being active at all social functions. His constant cheerfulness and quiet personality will win for him success and friends in whatever field he enters.

RUDOLPH KNOTEK

Born June 3, 1899, Chicago, Ill.

Harrison Technical High School.

"Automatic Control of Electric Flat Irons."

A. I. E. E.

"Relentless" Rudolph is one of the youngest and smallest men among the electricals but what he lacks in size and years he makes up in pep and energy. He can always be seen jumping around and directing things especially when he and a few more students get together to wrestle one or more of Professor Paul's problems in Hydraulics. His activity alone will carve for him a niche in the electrical hall of fame.
