

SIDNEY J. BURKE

Born February 8, 1898; Chicago, Ill.  
St. Phillips High School.

"Design of a Reinforced Concrete  
Chimney."

W. S. E.; Interclass Baseball, 1919.

Here is another Civil who spent ninety-five per cent of his time in the Armour Mission. In his last year at school Burke represented an express man with his large number of books under his arm. We don't know the reason why this state of affairs should have existed, but we have our suspicions.

DERWOOD S. CHASE

Born January 13, 1897.

Washington High School, Sioux Falls,  
S. D.

"Re-design of Badger Basket Factory  
including a change from steam to  
electrical power."

Ω. Λ., T. B. II. Pres. Senior Class;  
Class Track Team; Junior Play  
1920; Social Committee 1916-17; W.  
S. E.; A. I. E. E.

Derwood came to Armour seven years ago. Both before and after the war he established for himself an enviable scholastic record. So aside from the fact that he came back with more true Armour spirit he was none the worse off because of his interrupted college course. His spirit and popularity were attested to when the class of twenty-one chose him as their president.
