

WALTER JOSEPH ANDERSON

Born January 13, 1896, Chicago, Ill.

Lane Technical High School, 1914.

"Heat Transmission in Cooler Coils."

T. B. H.;  $\Phi$ . A. T.; A. Ch. E. S.

"Andy" came back from the war still full of ambition and finished school in fine form. Probably the service affected him slightly by making it difficult to get up without a bugle call and therefore his ten-thirties were sometimes a drudgery. After his arrival at school he was always wide awake and doing things, and did not take his sleep as others were wont to do. His long list of friends was only limited by his acquaintances. Wherever Andy was there was plenty of life and never a grouch.

MYNHART OSWALD BRUECKNER

Born October 15, 1898, Fort Wayne, Indiana.

Fort Wayne High School, 1916.

"The Electrostatic Precipitation of Soap in Oils."

$\Omega$ . A.; T. B. H.;  $\Phi$ . A. T.; A. Ch. E. S.; Social Committee, 1916-17; Class Treasurer, 1917-18; Junior Play, Class Secretary, 1920-21; Senior Ring and Pin Committee.

A good time was never overlooked or an opportunity passed by, when ever he was on deck. His success in this line can be readily attributed to his masterful looks and knockout smile.

We can't, however, overlook his ability in other lines because it is well worth mentioning as can be seen by his activities and accomplishments at school. The chemical laboratory was a favorite place of his but due to outside work he was unable to be there as much as he would have liked. To every one who knows him, he speaks for himself.
