

EMIL WILLIAM PFAFFLIN

Born October 2, 1899, Chicago, Ill.  
Parker High School.

"Reduction of ortho-Nitro-Benzoic  
Acid to Anthranilic Acid."

Δ. T. Δ.; A. Ch. E. S.; Social Committee, 1917-18; Chairman, 1918-19; Interclass Basketball, 1917-18, 1919-20; Glee Club, 1917-18, 1918-19, Junior Play, 1920.

"He was a Lion Among the Women"! So say all that meet him, even the women themselves. The thing by which we will remember him most are his dancing and the dances which he arranged for while on the social committee. Did you ever see his parallel on the polished foot boards? All of his activities did not push his studies aside as he was constantly surprising himself as well as others by achievements in scholarship. He is impressive from the start and can't help being successful with the ability he possesses.

WILLIAM JOHN SAVOYE

Born October 31, 1898, Westfield, New Jersey.

Manual Training High School, Brooklyn, N. Y.

"Zinc Nitride and Its Alloys."

Σ. K. Δ.; Φ. Α. Υ.; A. Ch. E. S.; Secretary A. Ch. E. S., 1920-21.

John comes from the east but he has left all of the high brow style behind him and come to us as the kind of scout we never wish to overlook. He was thoroughly good natured, a first class student and possessed of sound individuality along with a free good will. Above all, Savvy has a real head and knows how to use it for the best results. His clear thinking ability is one of the best assets of an engineer and will surely bring him where many other things wouldn't. The other side of his life at school can best be told of if you ask him about some of the Columbia girls.
