

GEORGE HENRY VORSHEIM

Born August 16, 1900, Chicago, Ill.

Austin High School.

"Commercial Preparation of Potassium Permanganate."

A. Ch. E. S.; Junior Play, 1920.

Vorsheim, the other survivor of the company, Little-Vorsheim, Inc., is the all around good fellow who hopped to the tune of the bell in the class play. It is rumored that his new system Calculus book is about to go to press, and that all the colleges of Greenland have already made contracts for Campbell's Pork and Beans. His main hobbies are Theology, Calculus, puzzles, and well there's a woman in the case. When we speak of a man of Vorsheim's caliber we have no doubt as to his success as he surely will come out on top.

EMIL FRANK WINTER

Born April 6, 1897, Chicago, Ill.

Lane Technical High School.

"The Reduction of ortho-Nitrobenzoic Acid to Anthranilic Acid."

Δ. T. Δ.; T. B. II.; Φ. Α. Ξ.; President Junior Class; Chairman Ring and Pin Committee, 1921; Social Committee, 1920-21; Interclass Basketball, 1917 to 1921; A. Ch. E. S., President, 1920-21, Vice-President, 1919-20; Junior Play, 1920; Cycle Staff, 1920; Armour Engineer, 1920-21.

"In his greatness lies his popularity," sums up Winter in a few words. He possess a rare ability and composure and is not of the kind who tries to kid himself and think he is getting away with it. All of his actions and words were clean-cut and frank, and he was never at a loss to form and express his opinions. His enthusiasm in class and school activities won a place for him among the leaders of his class, and the admiration of all. We may characterize him by saying he was never boastful but widely resourceful.
