

## Armour Fire Protection Engineering Society

|                      |                              |
|----------------------|------------------------------|
| W. E. Kingsley ..... | President                    |
| W. W. Oake .....     | Vice-President               |
| J. W. Roddick .....  | Secretary                    |
| E. W. Geisler .....  | Treasurer                    |
| R. R. Maguire .....  | Chairman of Social Committee |

The Fire Protection Engineering Society was reorganized on November 15, 1920, after having been dormant since the period of the war. President Kingsley delivered a very unique opening address, setting forth the object and aims of the society, after which plans for the future were discussed. It was decided that the old constitution of the society would not meet the present needs and a committee was appointed to revise it.

The members were then entertained by Professor Finnegan, head of the department of Fire Protection Engineering, who gave a very interesting and helpful talk on the need of technical men in the insurance field.

Due to the lack of a faculty leader because of the sudden and severe illness of Professor Finnegan, the society has not been very active in the past year; however, the ice has been broken, and it is with genuine anticipation that its members look forward to a year of activity and future enlargement and expansion.
