

Edward Longstreth Medal of Merit Awarded Republic Flow Meters Co.

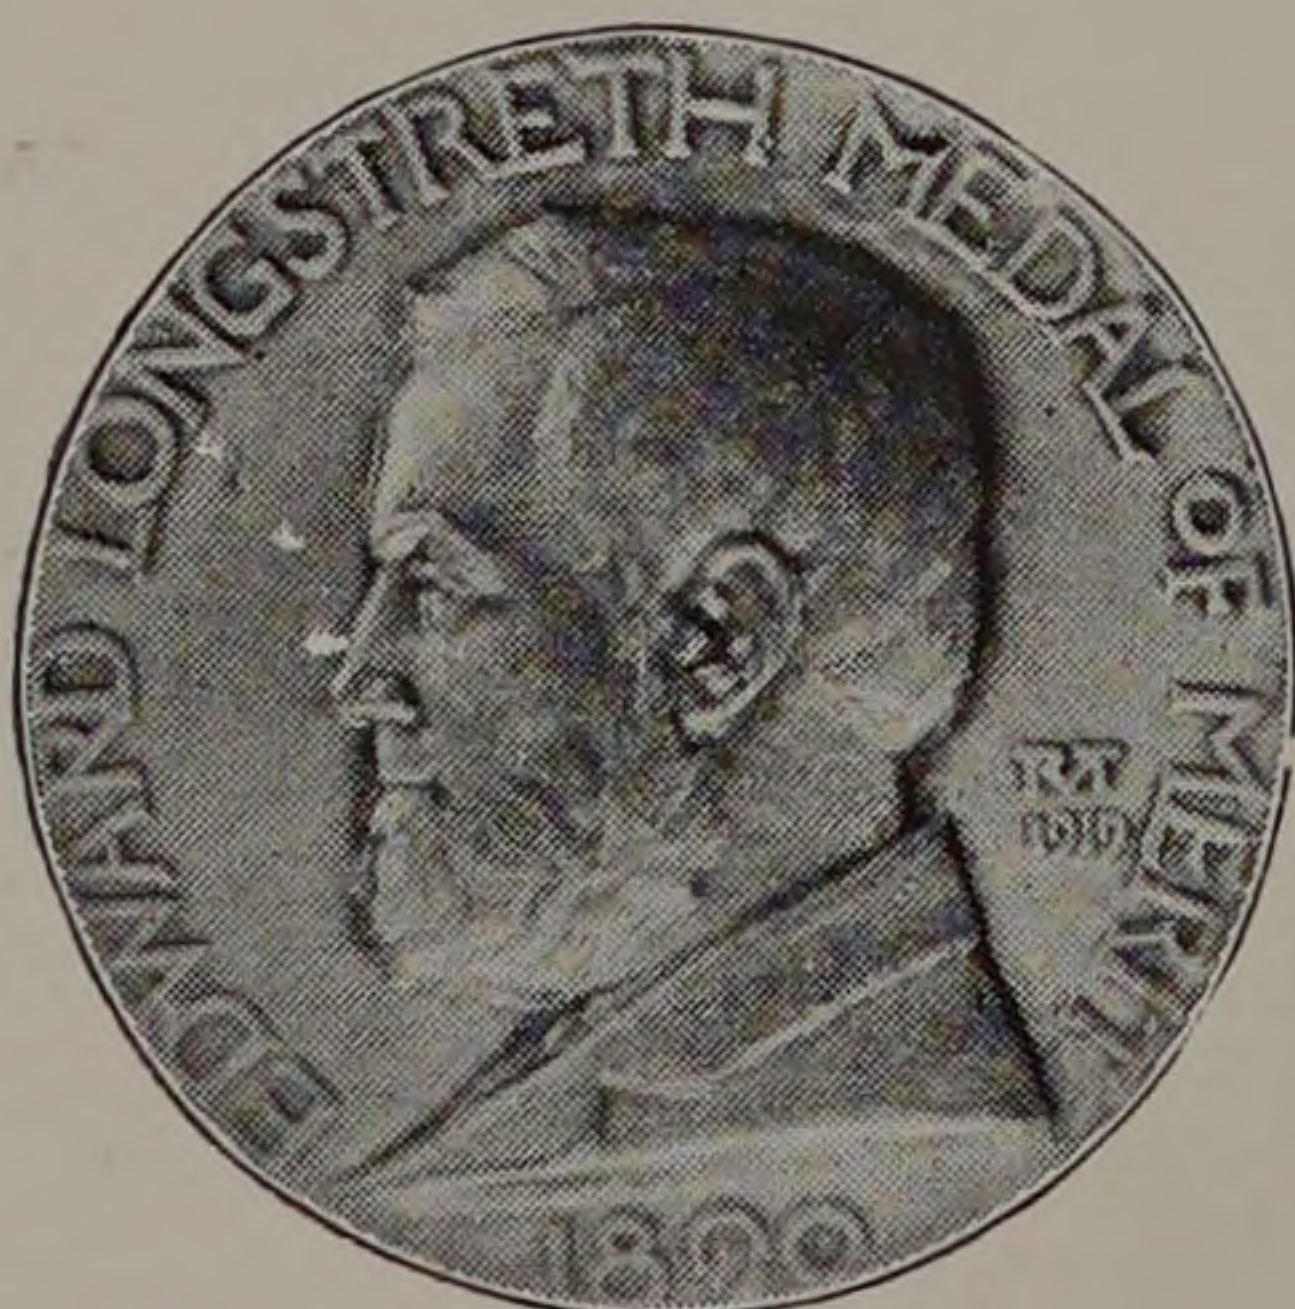

The Franklin Institute was founded in 1824, not only as an appropriate memorial to the name of Franklin, but as a means of continuing for all time a work, which throughout his long life, he perhaps regarded as his best; namely, the discovery of physical and natural laws and their application to increase the well-being and comfort of mankind.

In the month of May, 1890, Edward Longstreth, Esq., of Philadelphia, retired member of the Baldwin Locomotive Works, founded the Edward Longstreth Medal of Merit for the encouragement of invention, and the recognition of meritorious work in science and the industrial arts.

The Republic Flow Meters Company takes this means of announcing to its many friends the award of the Edward Longstreth Medal of Merit to Mr. Jacob M. Spitzglass, the inventor of the Republic Flow Meter and a member of this organization.

This recognition comes to a man whose untiring efforts have been devoted to perfecting a scientifically correct method of fluid measurement.
