

CLASSES

SAMUEL EISENSTEIN

Born January 1, 1900, New York, N. Y.
Carter H. Harrison Technical High School.
Mechanical Engineering.
Rho Delta Rho; A. S. M. E.
Basketball, 1918, '22.

Here we have the senior member of the Eisenstein-Sugarman Co. Most any time of the day he can be heard in consultation with his partner, which generally ends, "Come on, Maurie, let's go." He used to wield a mighty blue pencil over the calculus papers, which was the terror of the Sophs, but of late his pet diversion has been feeding oil to some hot bearing in the oil testing lab.

WILLARD E. ERICKSON

Chicago, February 4, 1901.
Mechanical Engineering.
J. H. Bowen High School.
Tau Beta Pi. A. S. M. E.

Willard's phenomenal record as a student runs a poor second to his popularity among his fellow men. When Eric licks the world in as complete and masterful a fashion as he has the Mechanical course at Armour, he will surely be a general of industry.
