

CLASSES

DAVID S. JENNINGS

Chicago, May 1, 1900.

Mechanical Engineering.

Hyde Park High School.

Tau Beta Pi; Sigma Kappa Delta.

Secretary A. S. M. E., 1921-22.

Vice-President Tau Beta Pi, 1922.

Shifters' Society.

Y. M. C. A.

If the success of an engineer depends upon his ability to solve difficult problems without an apparent brain-storm, then Dave Jennings surely will be a success in the profession. Of the Mark Twain type, and possessing that quality of originality in everything he says or does, he has never failed to impress us with his keen judgment and forceful personality. His witty remarks were numerous, but the one most common around the Institute was "Answer for me will ya."

ADOLPH KUELLMAR

St. Paul, Minnesota, April 7, 1901.

Mechanical Engineering.

Lane Tech. High, '18.

AA Degree from Lewis Institute, 1920.

The innocent stare from Kuellmar's baby blue eyes is only camouflage for that which lurks within. He is a conscientious and thorough worker and can always be depended on to produce the correct results at the appointed time.

Kuellmar is the sort of man that one is proud to have for a friend, and there is no doubt that he will win for himself an enviable position in the engineering world.
