

B. S. IN E. E.

GEORGE HENRY ADLER

Joliet, Ill., 1899.

Electrical Engineering.

Joliet High School.

A. I. E. E.

The Adler-Sloan debates of Junior days on the manner of teasing the characteristics out of a d. c. generator should never be forgotten. Ending as they always did, in mutual agreement, these debates served as a source of amusement and, at the same time, cleared up many technical points for all members of the squad. George is always ready for work or play at the proper time and is proficient at each.

SPERDS D. APOSTOLOS

Sparta, Greece, Sept. 25, 1894.

Electrical Engineering.

Gymnasium of Sparta.

Sigma Epsilon Sigma.

A. I. E. E.

A. R. A.

Mastering the course in electrical engineering and the American language at the same time is the enviable record of Armour's modern Pericles. After a year at the University of Illinois he served with Uncle Sam in the Signal Corps and at the close of the war decided that Armour needed him and, incidently, he needed Armour. His favorite expression is, "Say! you Irishman."
