

CLASSES

FRANK G. SHAY

Born Jan. 28, 1896, Turdosin, Bohemia.
Electrical Engineering.
Kenosha High School.
Lane Tech High School.
Y. M. C. A. College of Commerce, 1914-15.
A. I. E. E.

Shay's greatest virtue is his insistence upon accuracy. Whenever he took a sight in surveying work the plumb bob had to be exactly over the point, even if he had to hold it there. Shay worked four years after his sophomore year in high school, but he finally decided that mental work was more suited to a man of his build than physical exertion, so he finished his high school work and came to Armour.

ARTHUR H. SLOAN

Born June 17, 1900, Chicago, Ill.
Electrical Engineering.
Harrison Tech High School.
A. I. E. E.

Getting his daily school work is Sloan's chief concern. Plotting curves and wrestling with several volumes by Steinmetz are his pet hobbies, but of late sharpshooting in lecture classes has taken a great deal of his attention. Although quiet and persevering, Sloan is always on hand to support school activities. His best known phrase is, "I don't quite understand."
