

CLASSES

MAX H. MARINE

Born June 6, 1903, Cadillac, Michigan.
Chemical Engineering.
Waller High School.
A. Ch. E. S.

Max is the youthful professor in our group. He has been chosen to assist Professor Freud in his organic laboratory. Max's memory is remarkable. When some professor asks a question about previous work which most of us have forgotten, Max is sure to be there with an answer. Besides, who is our metallurgy genius? Ask that of any senior chemical.

BRUNO ZIGMUNT NOWAKOWSKI

Born in Zyrardow, Poland.
Chemical Engineering.
Lane Technical.

Assistant Editor Cycle, 1921; Treasurer, A. Ch. E. S., 1922. Glee Club, 1920-21; Mandolin Club, 1920-21.

"Bieze," "Count von Babo," "Noah," are some of the titles that Nowakowski possesses, not to mention the fact that he is sometimes dubbed the chief philosopher of the class. Notwithstanding this heavy handicap, Bruno has managed to tread his way through four years of the Chemical course at Armour, and to have gained the distinction of breaking more glassware than any of his classmates. He is as thoroughly an American as anyone of foreign extraction can be, and he also is the idealist which one would assume a person of his race would be.

If you ever enter the Chemical laboratory and hear a peculiar noise which might be intended for singing, you may be sure that "Noah" is close by.
