

Photo Engraving

PHOTO-ENGRAVING in our plant is no longer based on experiments, but based on our knowledge of facts through experience along these lines.

It is at once apparent that to be able to express clearly one's wants when placing an order for a photograph, drawing, printing plate or any item connected with illustrating or printing, is to avoid delays and misunderstanding, to save money and otherwise contribute to the mutual benefit of buyer and seller.

This is our aim and with our knowledge as to just how this should be done, we hope to serve you.
