It was an enthusiastic crowd of Civils that met at the Union station Friday evening, June second, for the start to the wilds of northern Wisconsin. Even the railroad officials recognized the importance of the occasion and provided a special "Armour car" for our use. They hinted that it was because of experiences with Civils of former summer camps that we were thus honored. We made no inquiries regarding reasons, but spent the evening making merry and preventing sleep from spoiling the pleasure of any one within range of our voices.
