

HOLLAND LAUNDRY, INC., PHILADELPHIA, SOLVED THEIR CONDENSATION AND BOILER FEED PROBLEMS WITH CRANETILT STEAM TRAPS. MR. WINTERSTEIN IS PLANT MANAGER

CRANETILT TRAPS ARE ENTIRELY AUTOMATIC

Draining separators, pipe-lines or coils, discharging condensation from low pressure or vacuum lines into higher pressure systems, or returning hot condensation promptly to boilers, Cranetilt traps, once installed and adjusted, stay on the job day and night. The occasional inspection

which any automatic device should receive, is easy because all working parts are outside. Floats or hidden pots are entirely eliminated. They do not "air-bind." They save and satisfy in hundreds of important installations. They are the final answer to *your* condensation problems.
