

This year has seen the completion of plans for merging Armour Institute of Technology with the Engineering College of Northwestern University. The consolidation is a logical and happy solution of the problems confronting the officers of the Institute at the present time, and it marks the beginning of a period of expansion that will make Armour Institute of Technology the foremost engineering school in the West, both in prestige and in physical equipment.

The expansion program calls for a joint drive by Armour Institute of Technology and Northwestern University for the purpose of raising, during the next five years or sooner if possible, a capital fund of ten million dollars. Five millions of this is to be used for the erection of buildings on the Evanston Campus and on the Alexander McKinlock Campus, and five millions is to be used as an endowment fund.

The one phase of the matter that gives the keenest pleasure both to the students and to the alumni is that the name "ARMOUR" will be forever retained in the name of the school. As Armour College of Engineering and Architecture of Northwestern University the school will remain as a living memorial to its founder, Mr. Philip D. Armour, and to the members of the Armour Family who have carried on his great work.

JOE GROSQUTH.
