

SOCIAL FRATERNITIES

Alpha Epsilon of Phi Kappa Sigma

Alpha Epsilon Chapter of the Phi Kappa Sigma Fraternity is the oldest fraternity in existence on the campus of Armour Institute of Technology. It preceded the next oldest fraternity by three years and received its charter from the Grand Chapter in 1898.

Alpha Epsilon Chapter is the twenty-fourth chapter of a national fraternity reaching from coast to coast, located in all of the prominent colleges, all of the Big Ten, and consisting of thirty-three chapters. The parent chapter was founded in 1850 at the University of Pennsylvania. Hence Phi Kappa Sigma is the oldest fraternity at the Armour Institute of Technology.

Alpha Epsilon Chapter feels quite proud of its record at the Institute and of the men who compose and have carried the badge of the fraternity and the standard of Armour Institute. Men who have accomplished great things in the business world and who have helped to make the Armour Institute a synonym for well trained engineers have been members of Alpha Epsilon Chapter. Roy M. Henderson, the only alumnus elected to the Board of Trustees, is a Phi Kap. Allan B. Benedict, the President of the Armour Institute Alumni Association, is another of the brothers. Many others of prominence in business circles have passed through the ranks and who are now active alumni of both Alpha Epsilon Chapter and of the Alma Mater.

What the future may hold for Alpha Epsilon no one may say, but whatever may occur the same indomitable spirit will prevail and Alpha Epsilon of Phi Kappa Sigma will not die but live a new life glorifying forever the Armour Institute of Technology.
