

*Top Row—KLEIN, BOYNTON, TROGNITZ, ATTWOOD, STABOVITZ, YOUNG.  
Second Row—HEIMASTER, M. P. JOHNSON, FABIAN, KRAMER, MISEGADES, NAEF.  
Bottom Row—DUFOUR, F. O. JOHNSON, YOUNT, EGAN, BROWN.*

## THE CHEMICALS

Such plans included the big smoker held at Triangle Fraternity house on Tuesday, March 6th. A good time is always had at such an affair, but it seemed as if an unusually fine time was enjoyed at that get-together. Then came the banquet held on April 24th. There is something about a banquet that brings out all the good qualities of such a group of men—maybe it's the food or the abundance of smokes. At least the affair was very successful, and everyone came away from it with the thought of an evening well spent. For the most part this was due to the snappy speeches and talks which are dear to the heart of every embryo engineer, but which are also perfectly capable of becoming a bore if made too long.

As for the meetings of the chapter during the school year, we were fortunate in being able to have many prominent speakers, known not only for their chemical knowledge but for their ability to make a perfect address on their subject. The results were everything that could be desired.

The A. I. Ch. E. has had a successful and happy year. To the Seniors who are leaving and getting out into real chemistry, the chapter extends a sincere hope that they will become chemical engineers, and that some day they will come back to the chapter as speakers. The Seniors will be missed, but the chapter is strong in the lower classes and able to carry on.
