Mr. Cooley of the Whiting Co., of Harvey, continued along the line of heat transfer with a talk presented to the society on the 21st of March. His subject was "Evaporators," dealing with the methods of design and the uses of the specialized types. He explained in detail several of the latest products of the company.

March 26th was the date of the annual smoker which was held at the Phi Pi Phi House. Members of the Freshman Class were invited, and a large turnout of the members of all the classes as well as many of the faculty made this affair one of the most successful ever given by the society.
