

## THE CLASS OF 1932

friendship between the members of the class. Thus, we may say that the class of '32 has been well represented in extra curriculum activities.

Although it is well known that the primary object at any engineering school is to become familiar with the elements of engineering, the junior class realized that it was unwise to neglect the social aspect of college life. As it is customary to reserve mention of the best things until the last, let us dwell a moment upon the great social event of the year, the Junior Prom. In accordance with the precedent of accomplishing things, established by the junior class, the annual dance was a huge success. On an early May eve-

ning the class cast aside its academic troubles, and gathered together to dance to the hyphenated, syncopated rhythms of the best orchestra in Chicago. Second to the Junior Formal was the Junior Informal, held on January 16 at the Steuben Club. Here, again, the junior class proved its engineering ability in the

production of a larger and better dance.

Each member of the junior class begins to realize that it is now time to take an inventory of his ability. There is still one year to go, but with the passing of that year the opportunities of student life and activities of the Institute will be placed behind. It is now necessary for each one to

Westerberg, Rudolph, Longwell, Hallen, Schinke, Bowman, Cannon, Jost, Tibbits, Sherck, Meehan, Nordell, Minnick, Winbolt, Cornwell, McGill, Colcord, Grosses.

Melcord, Davis, Korrell, Stockmann, Rossing, Heckmiller, Richter, Beal, Jackson, Frye, Milevsky, Stalzer, Tilt, Arends, Hill, Krahle.
