Founded at the University of Illinois in 1899 for the purpose of promoting high scholarship and original investigation in all branches of pure and applied chemistry, Phi Lambda Upsilon, honorary chemical engineering, now numbers twenty-eight active chapters and one alumni chapter. The total membership is about four thousand.

Through the efforts of two members of the faculty, Professor C. A. Tibbals and Mr. C. F. Smith, Omicron chapter of Phi Lambda Upsilon was chartered in 1920.

Election to membership takes place in the beginning of each semester. Members of the junior and senior classes and the highest sophomore student in chemical engineering are eligible.

The basis of election is scholarship. This is determined by averaging all grades, giving chemical grades twice the value of the others. The vote on scholarship must be unanimous. The personality of the student is considered only so far as it pertains to habits, neatness and honesty.
