

DEPARTMENT OF FIRE PROTECTION ENGINEERING

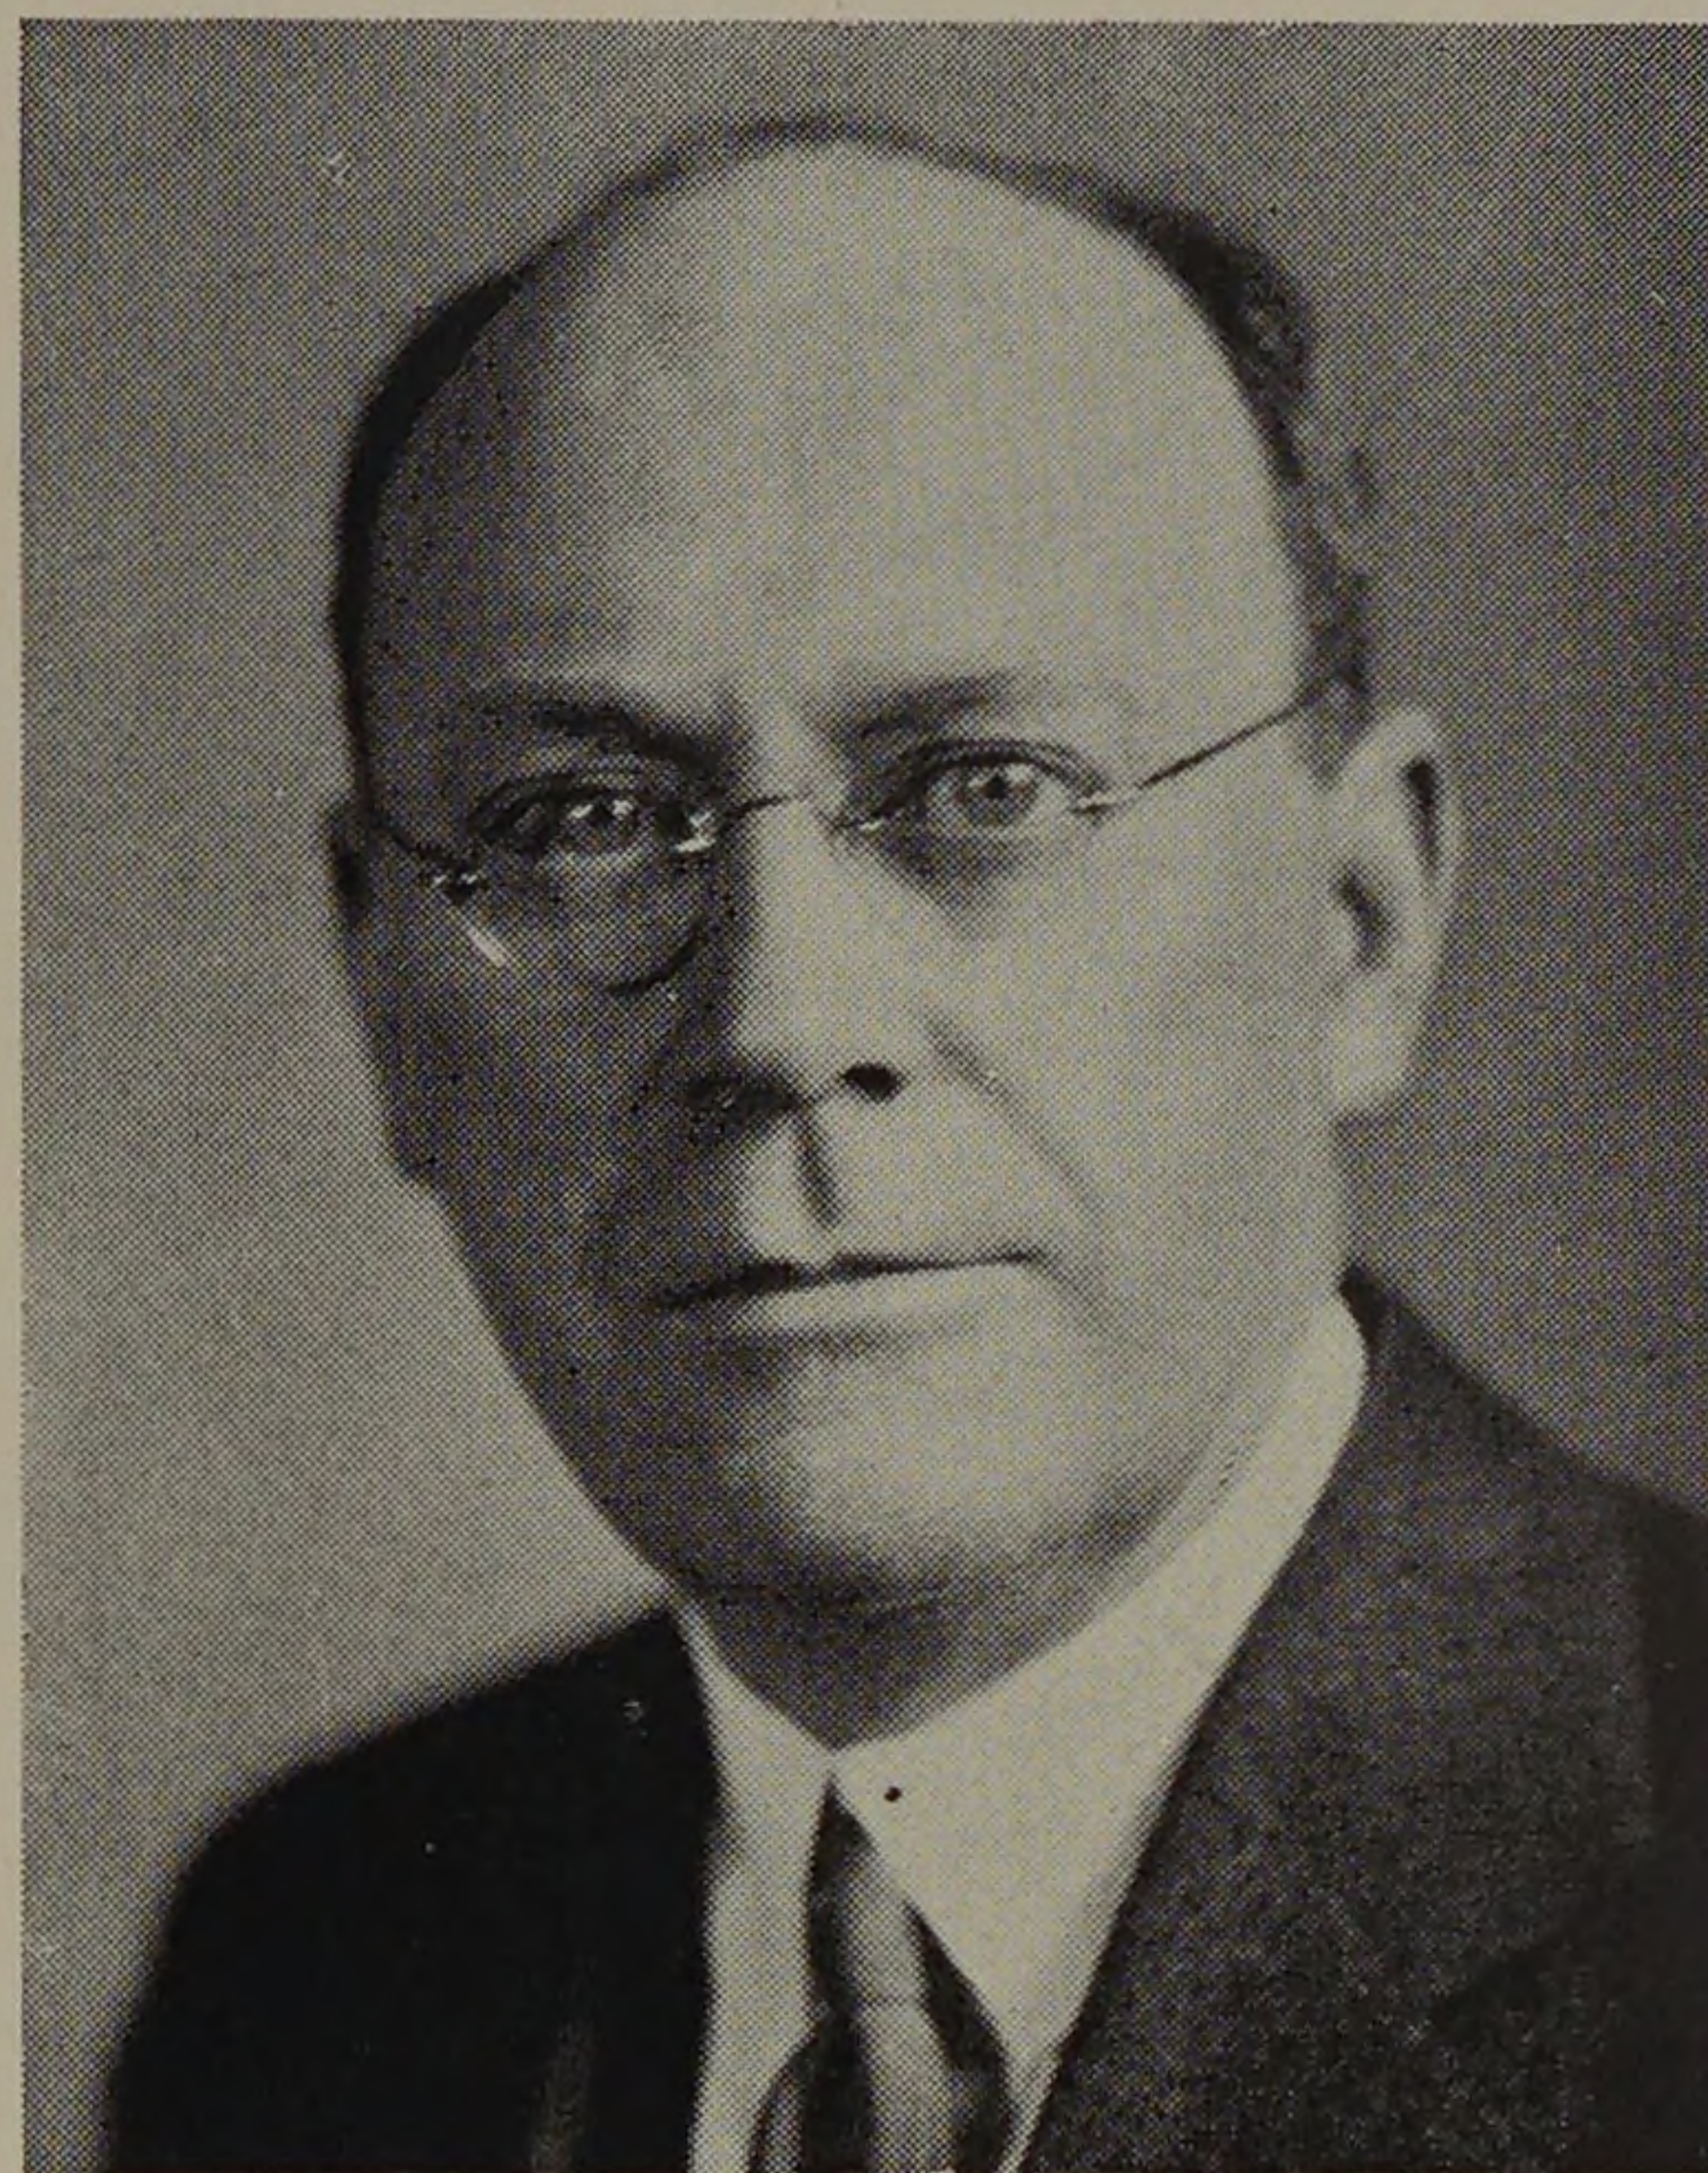

Joseph Bernard Finnegan, S.B.
S.B. Massachusetts Institute of Technology
Professor of Fire Protection Engineering and Head of the Department
Tau Beta Pi, Salamander, Sphinx

Fire protection engineering practice during the past year has met unusual problems caused by the increase in the number of unoccupied buildings and the general tendency to economize by reducing expenditures for fire protection, both factors tending to increase fire losses. Fire insurance companies and bureaus like other business organizations, have been compelled to reduce operating expenses, and it is therefore especially pleasing that all 1932 graduates of this department were employed immediately after the end of the school year, most of them through the operation of the scholarship plan.

Carl H. Johnson, Assistant Professor, resigned in June to enter the engineering staff of the Iowa Insurance Service Bureau. Harold L. Norway of the staff of Underwriter's Laboratories was appointed to succeed Professor Johnson. Mr. Norway is a graduate of the department of mechanical engineering at Case School of Applied Science. He has had ten years of experience in test and research work with the Commonwealth Edison Company and in two engineering departments at Underwriter's Laboratories.

Increasing demands on the time of Professor Holmes concerning committee activities and field tests have made it necessary to transfer his sophomore classes to Professor Finnegan.

Our students continue to show a natural and proper interest in extra-curricular activities, and the morale of the department is excellent.

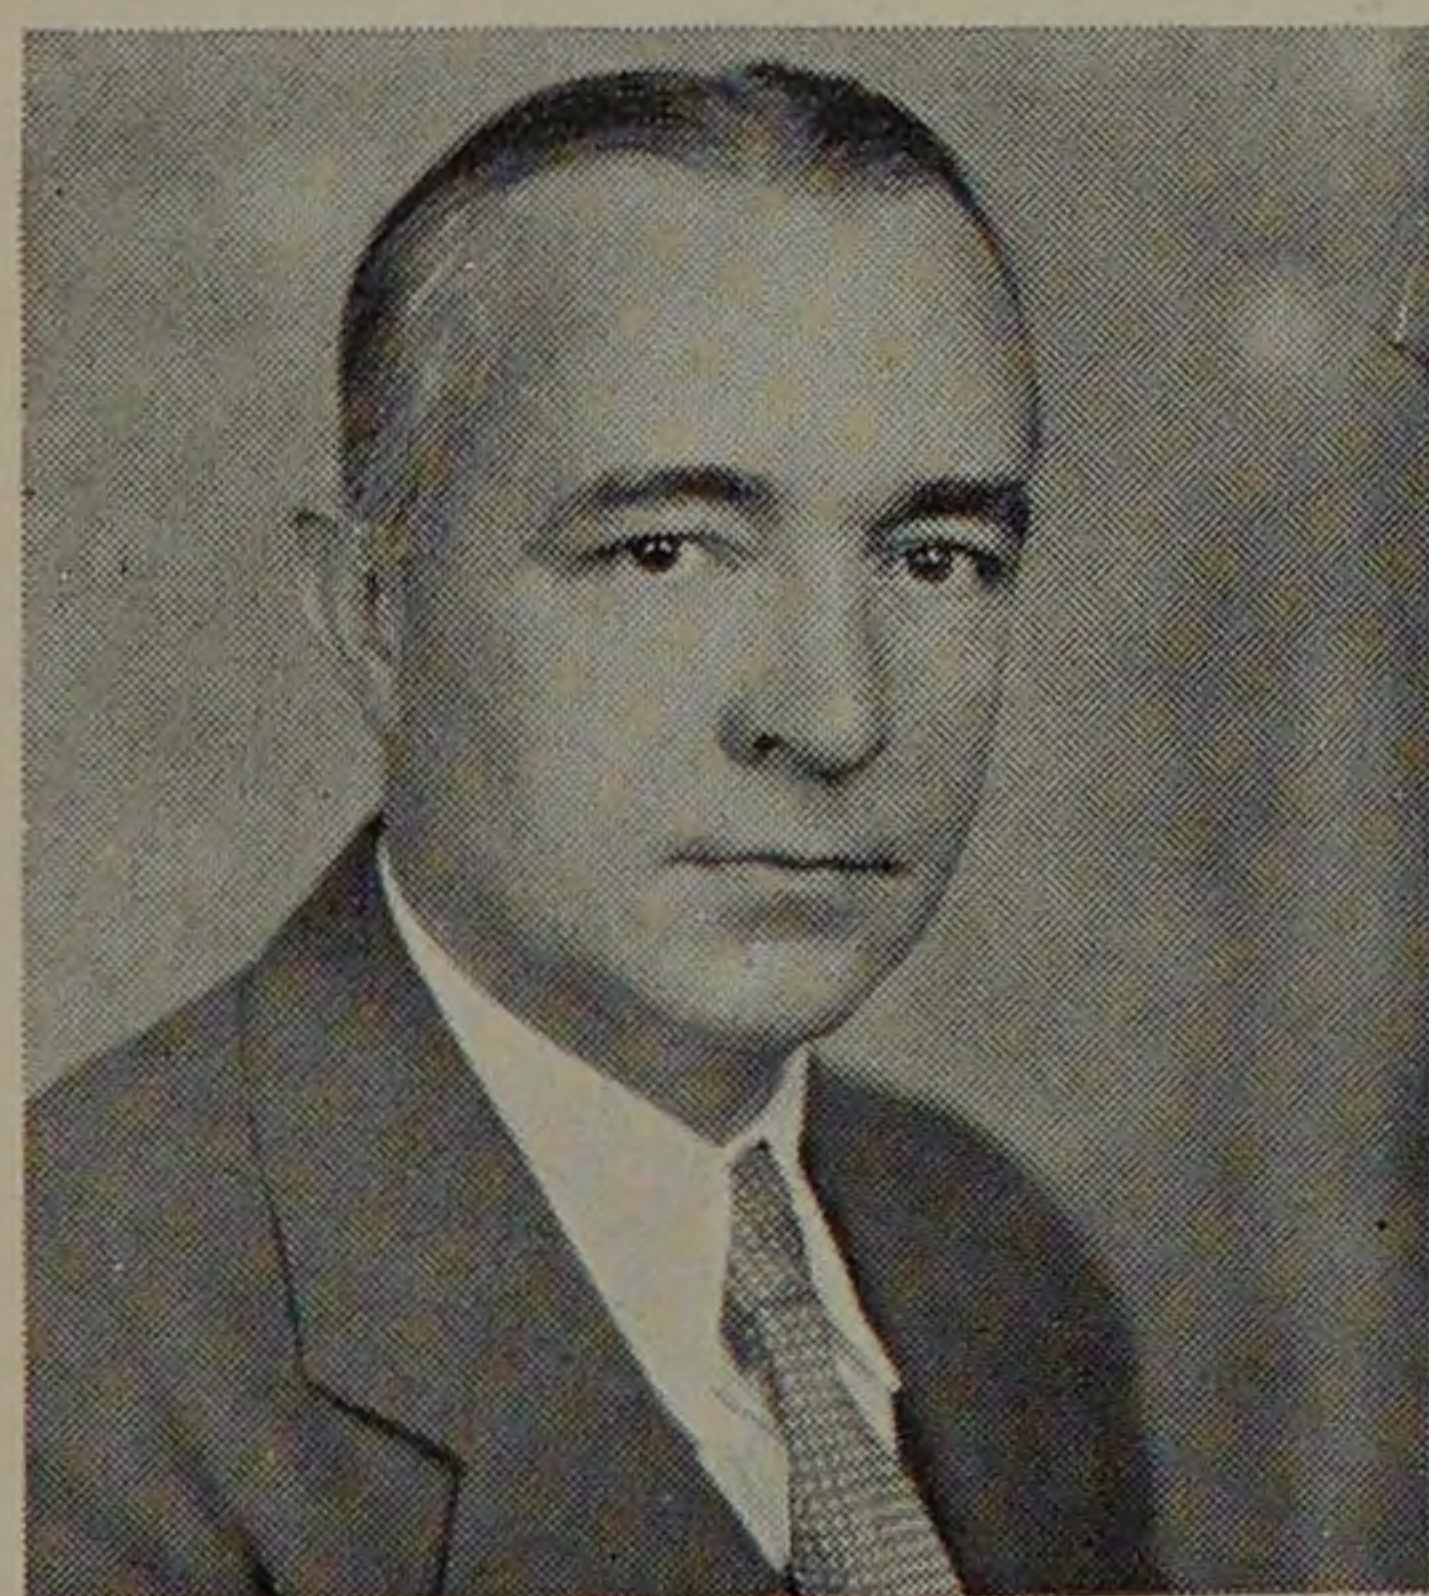

Joseph B. Finnegan

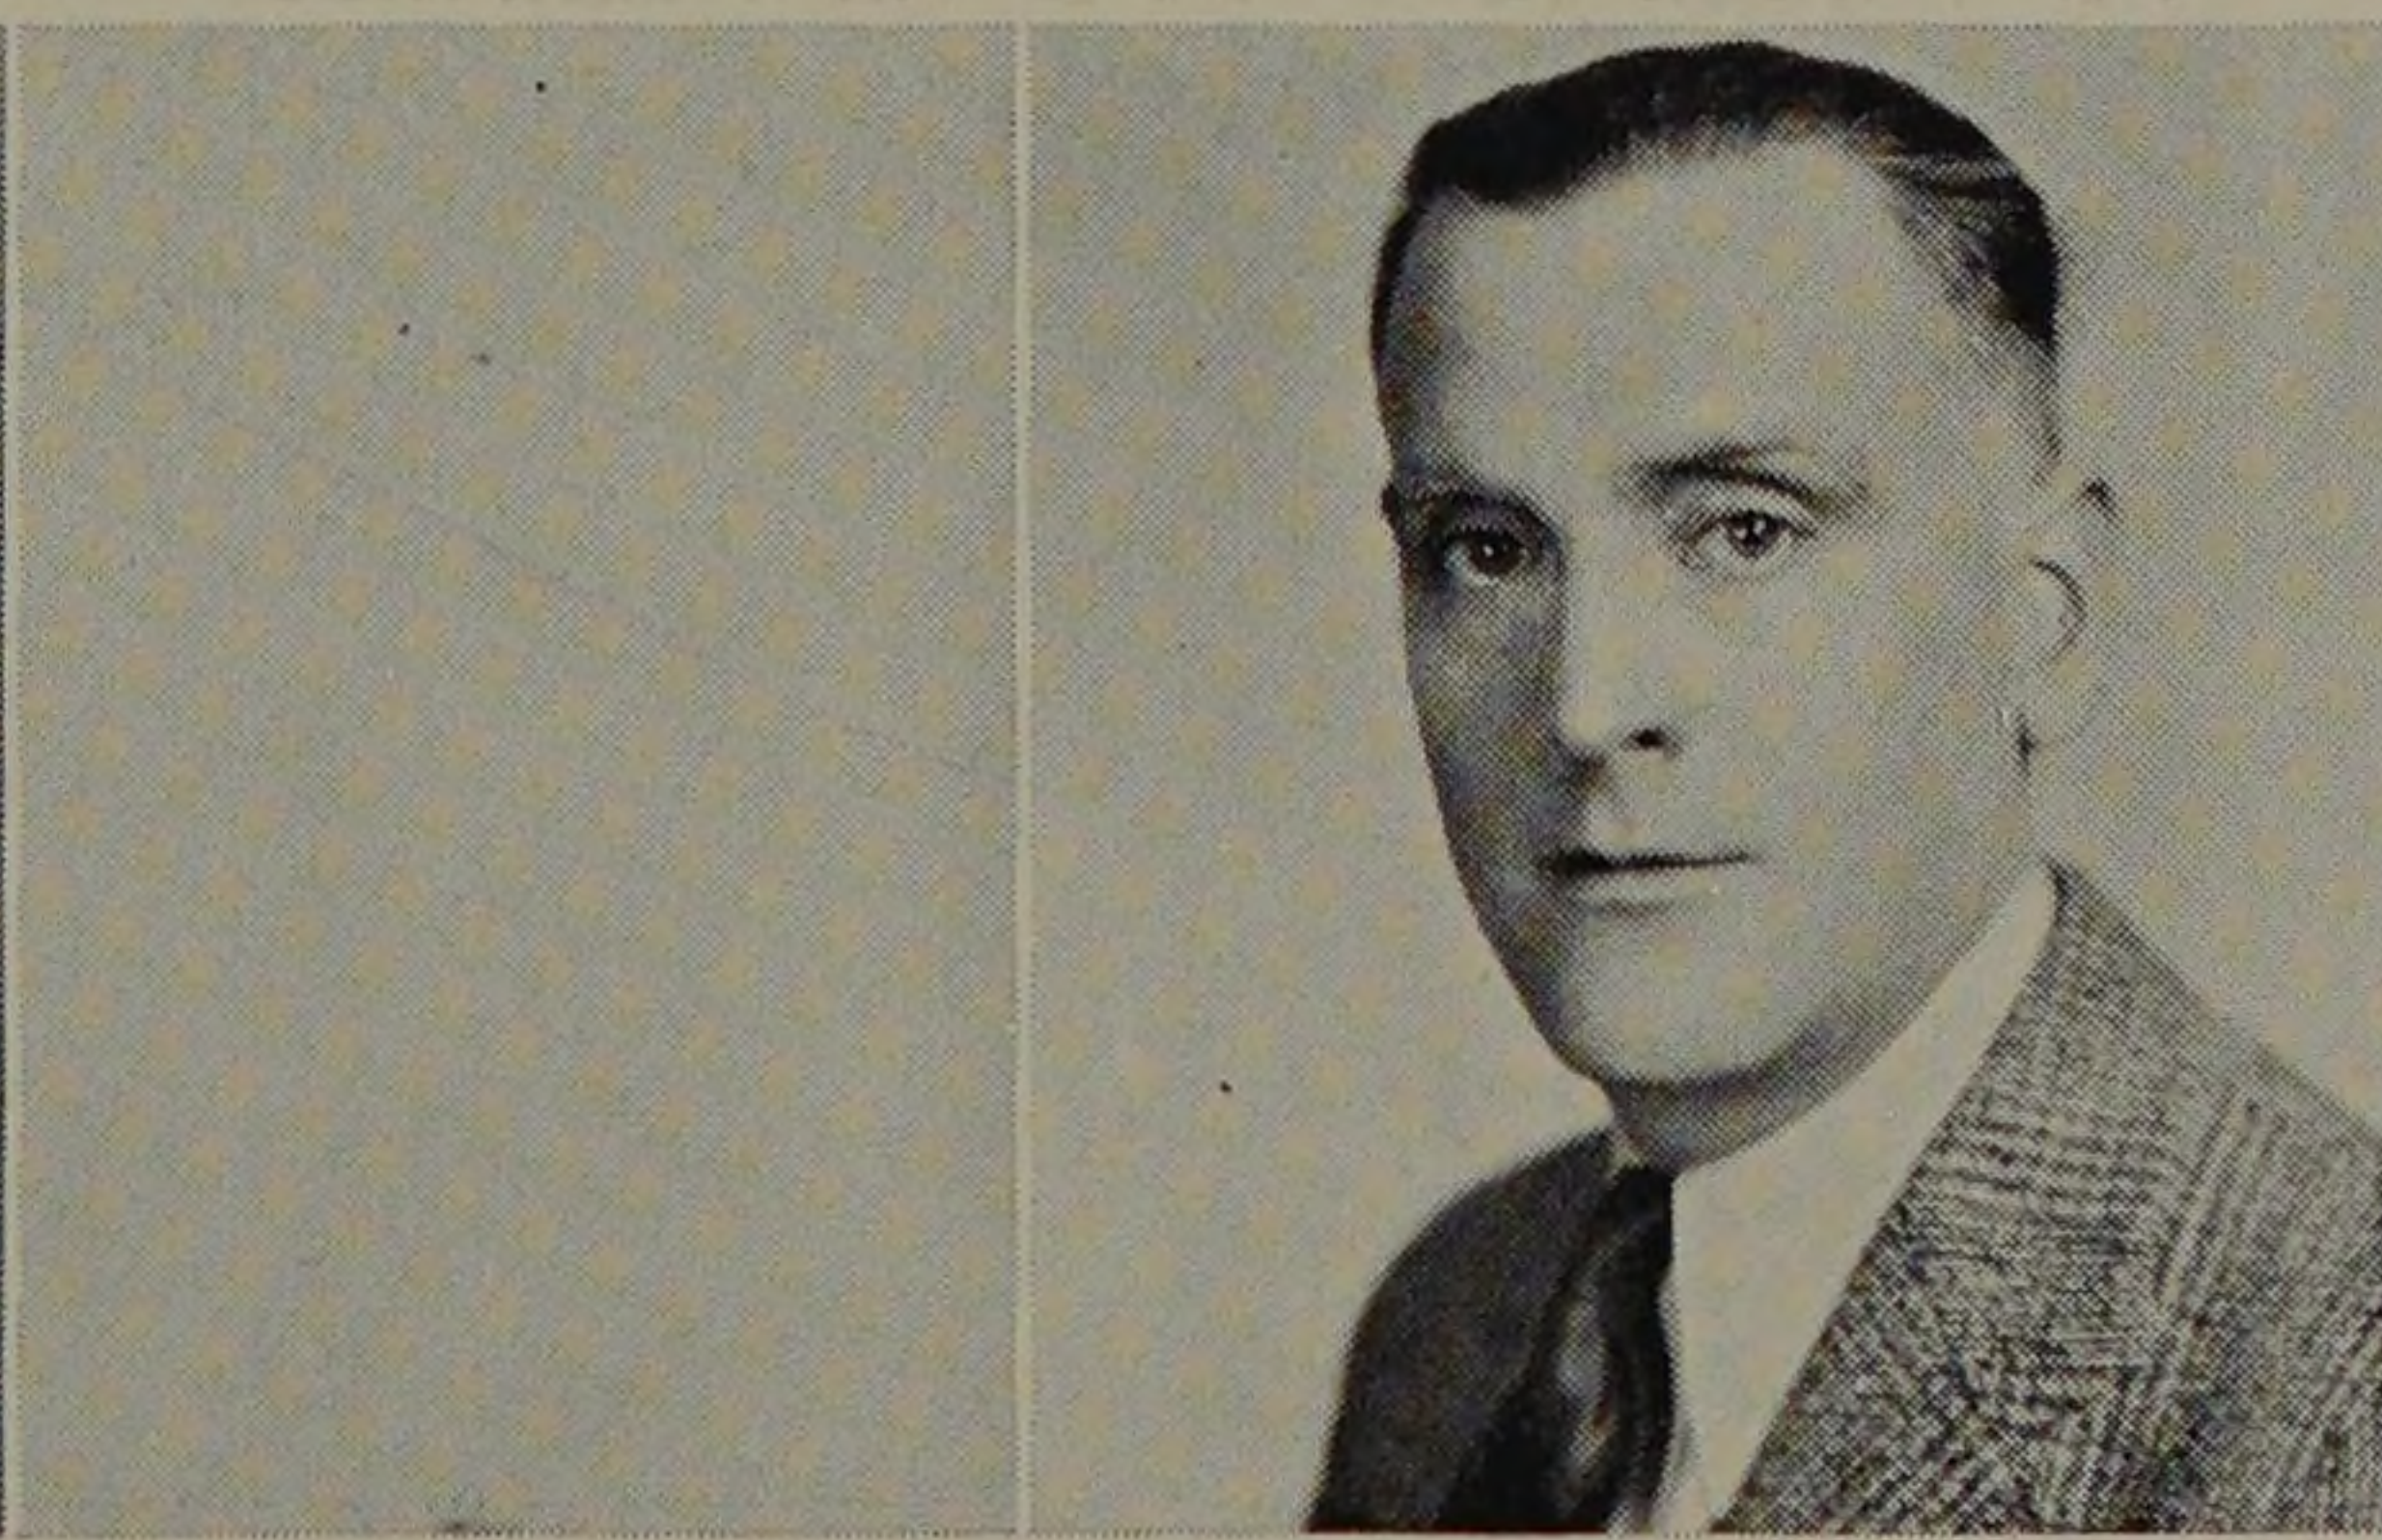

Otto Louis Robinson B.S.
B.S. Purdue University
Associate Professor of Fire Protection
Engineering
Salamander, Acacia

Charles Page Holmes S.B.
S.B. Massachusetts Institute of Tech-
nology
Salamander, Alpha Chi Epsilon

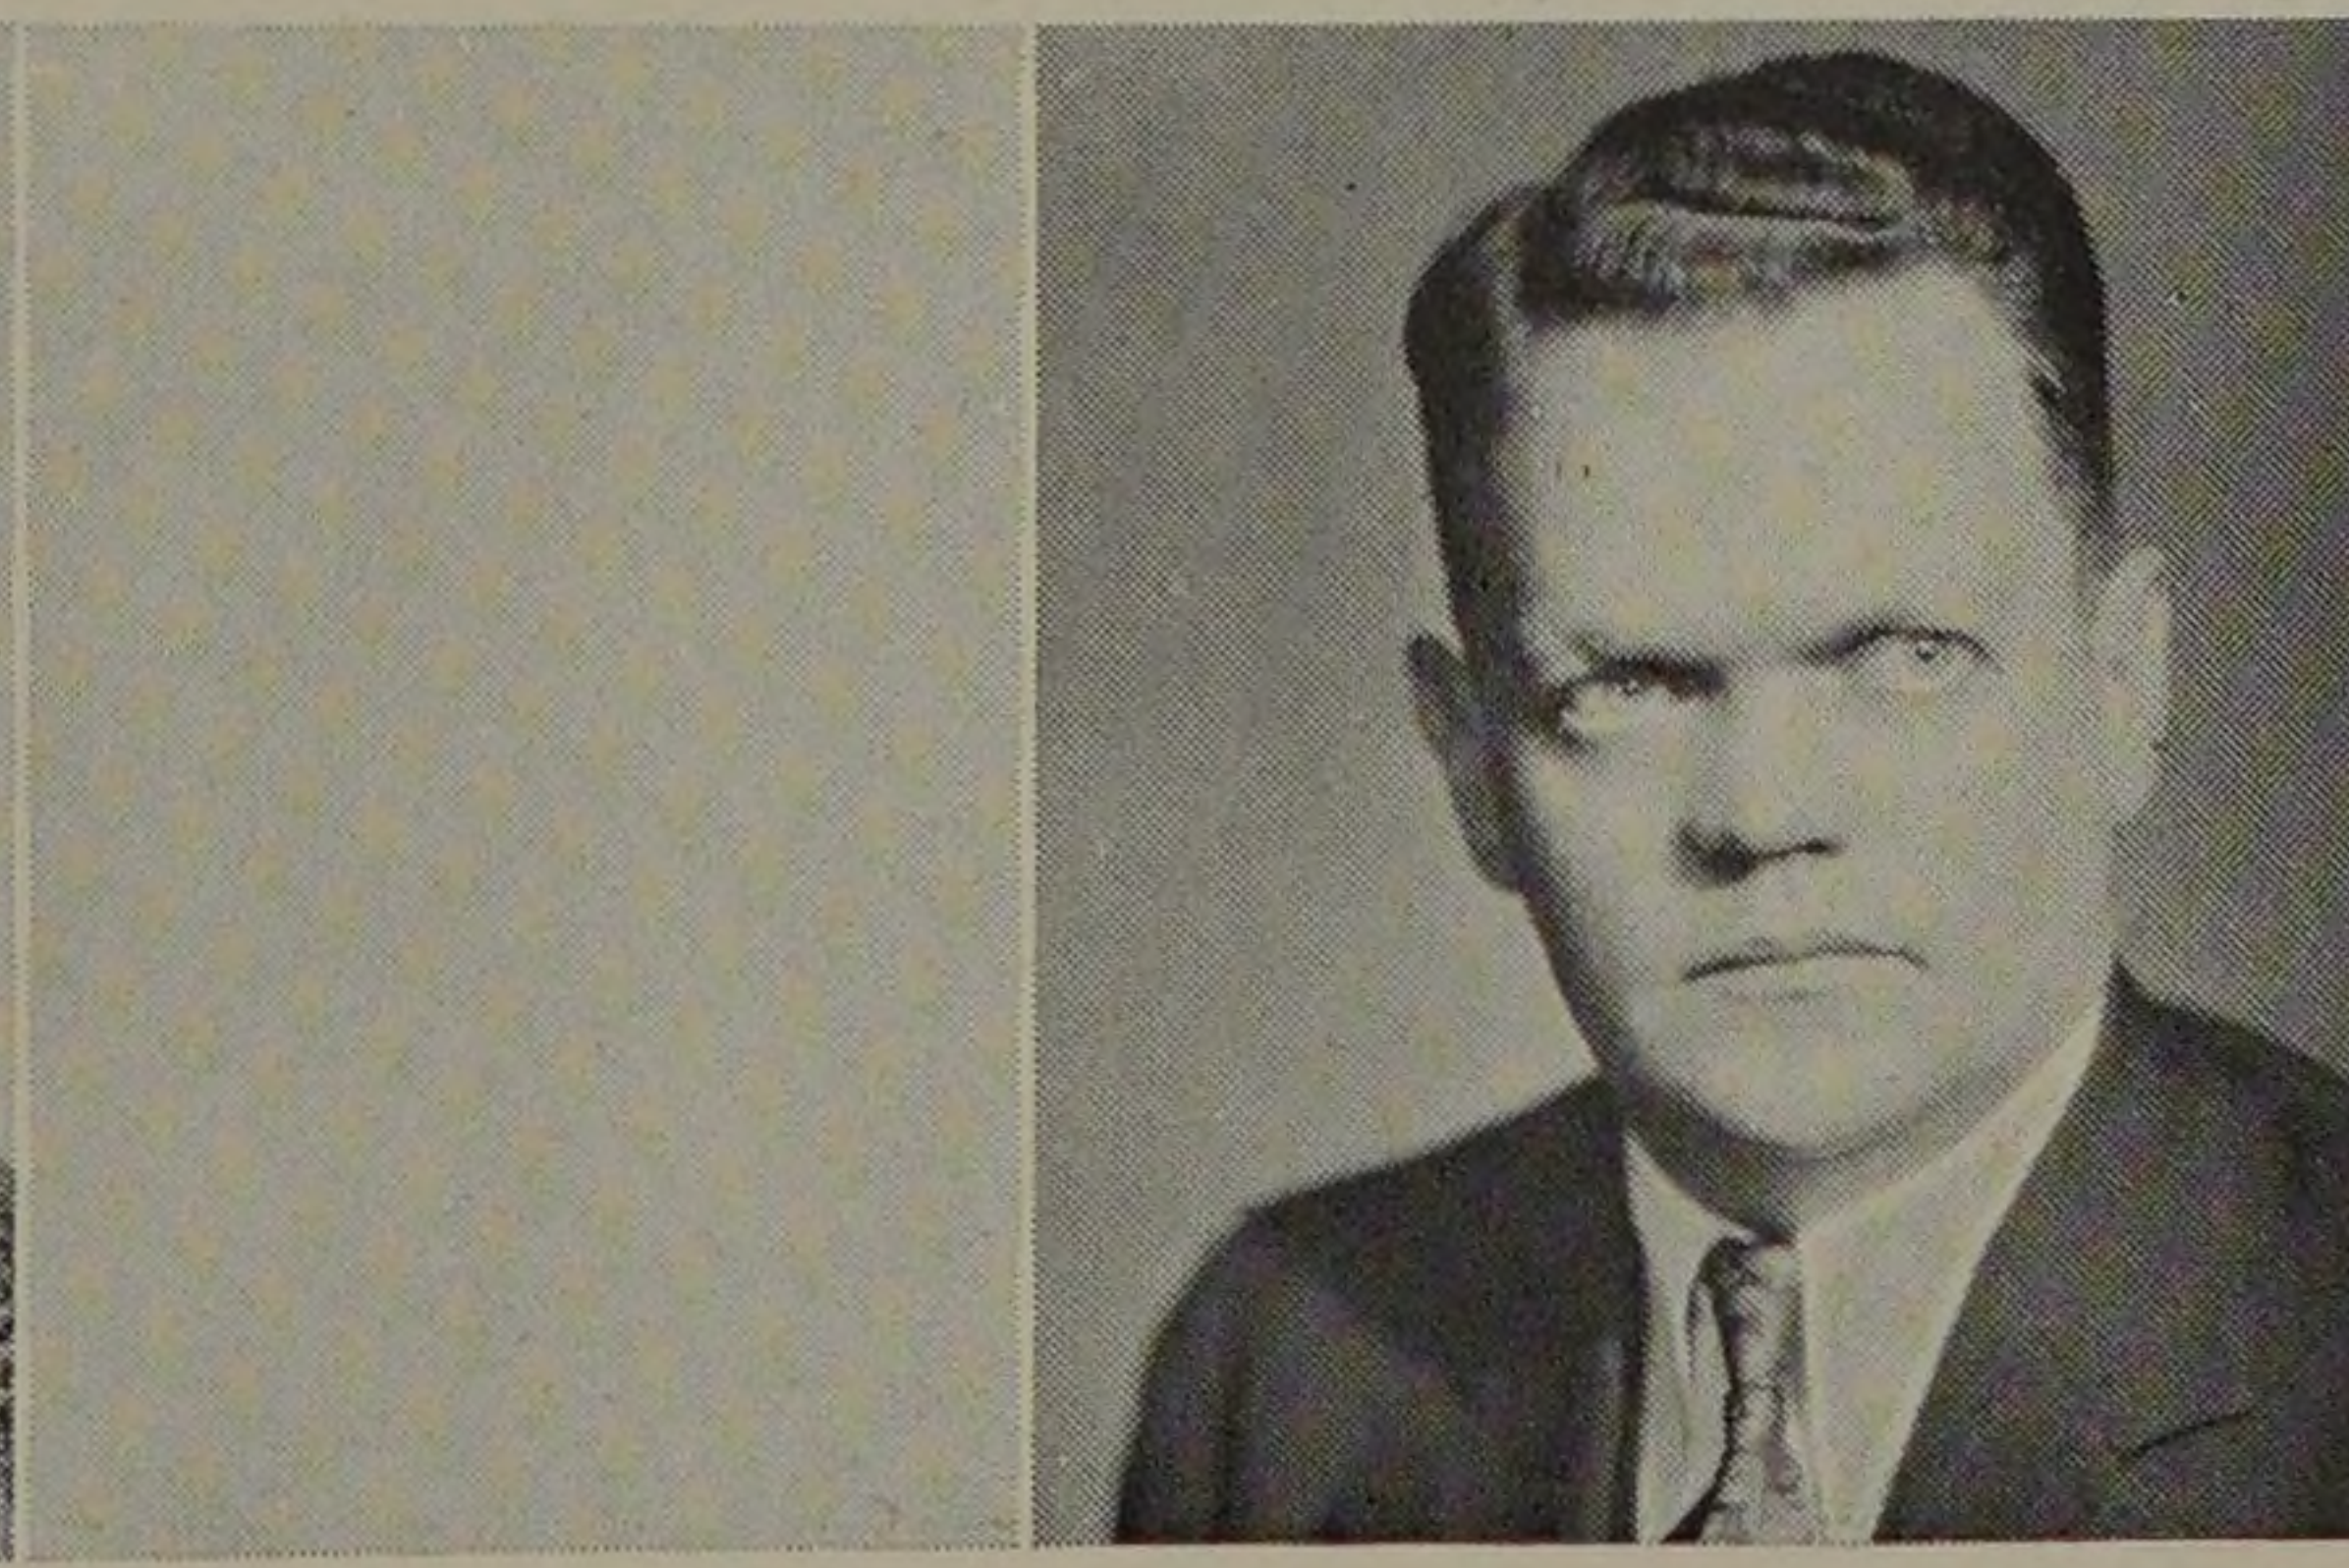

Harold Leighton Norway B.S.
B.S. Case School of Applied Science
Instructor in Fire Protection Engineering

O. L. Robinson

C. P. Holmes

H. L. Norway
