THE CYCLE, 1933

In compiling and editing this book, the Cycle of 1933, it has been our endeavor to present accurately an account of the events which have taken place and to carefully record the achievements which have been accomplished during this period. We have attempted to capture in picture and printed word the typical or particular Armour life as well as the usual college activity and to confine them both within these pages for our present pleasure and perhaps as a means of recalling to mind certain joyous occasions at a time when these might have faded from our memory.

The gathering together and organizing of material for the Cycle of 1933 was a responsibility, or rather an opportunity, which we all accepted with the determination to do our best in trying to produce a book that would be received favorably. We hope that the result of our effort has not fallen short of our desires.

To the members of the staff who have put forth so much effort and who sacrificed so many of their crowded hours toward the

successful completion of their specific assignments and our combined result, we are most sincerely grateful.

President Hotchkiss, Dean Penn, Dean Heald, and Mr. Allison were ever ready to lend an ear and a hand to the solution of our problems. The Faculty Committee, Professor Mangold, Professor Perry, and Professor Spencer, under whose supervision we were privileged to work, proved an inexhaustible source of assistance and advice.

Without the aid of Mr. Enoch V. Linden and Mr. James A. Motherway, the difficulties encountered in the actual building of the book might not have been so easily removed. We are especially grateful to Mr. H. H. Brinker for his courtesy in granting permission to use pictures from the Century of Progress.

The end of our task brings also an end to the pleasant associations created by it. This we regret, but, as has been the world's way for all time, one relinquishes the hold, another takes it up, and so continues the natural progress.
