

OF CHEMICAL ENGINEERS

1920, and obtained his Doctor's degree at the University of Wisconsin.

On December 9, a joint meeting with Alpha Chi Sigma, professional chemical fraternity, was held for the purpose of co-ordinating the work of the two groups. Dr. V. W. Meloche, Assistant Professor of Inorganic and Analytical Chemistry at the University of Wisconsin and officer of the Grand Chapter of Alpha Chi Sigma, addressed the group. He gave an illustrated lecture on the scientific study of lake water and its effects on fish life. Dr. Meloche also described the details of micro-analysis used in the testing of lake water.

The yearly smoker was held on December 29, at the Phi Kappa Sigma House. Here the difficulties of the struggling embryo-chemist were forgotten as the evening passed on wings of laughter and good cheer amidst the smoke rings and cards.

The struggle for the Schmier Chemiker trophy has been very intense this year. This, the official trophy of the organization, is a replica of a broken flask, engraved suitably, and attached to a safety pin. It has changed hands very rapidly, the better members of the Senior Class outdoing themselves in their earnestness.
