Faculty Advisor

The Fire Protection Engineering Society is an organization which strives to maintain interest in the field of fire protection engineering, and to give the members a definite contact with men in the field. An attempt is made to secure a prominent and successful insurance man or fire protection engineer to speak before the Society bi-weekly, the speakers to be selected from every conceivable branch of the work. The Society is not maintained solely for the gathering of technical information, however, but succeeds in carrying on an abbreviated social program in the form of a smoker held in the early spring of the year.

The first speaker of the past year was Mr. F. J. Prindle of the Chicago Fire Prevention Bureau. On October 21, he gave a very interesting talk on the work of the Bureau and its developments. Shortly after, on October 28, the Society had as its guest speaker, Chief McDonald of the Fire Prevention Committee of "A Century of Progress." He gave some very valuable information concerning the fire fighting facilities of Chicago's second World's Fair.

On November 14, Mr. F. C. Snapp of the Farm De-

Peavey, Marow, Hedin, Kerlin, Freitag, Sorensen, Lukas, Neal, Rasmussen, Larson, Zibble, Shaw
