Tau Beta Pi, an engineering honorary society, was founded at Lehigh University, Bethlehem, Pennsylvania, in June, 1885. Its primary purpose is to confer honor upon those engineering students who have maintained a high standard of scholarship, and have also displayed a high degree of initiative, a spirit of leadership, and a strong character during their years at college. It has been the aim of Tau Beta Pi to stress the cultural side of a student's life, an aspect that is too often forgotten by an engineering student.
