"In order that those men in the profession of Electrical Engineering, who, by their attainments in the college or in practice, have manifested a deep interest and marked ability in their chosen life work, may be brought into closer union whereby mutual benefit may be derived," ETA KAPPA NU, honor electrical fraternity, was established. The fraternity was organized in 1903 by ten student members of the department of electrical engineering at the University of Illinois. These students realized that grouping professional men and students was necessary if a profession was to expand completely.

Realizing that affiliation with this fraternity offered many advantages, a group of students of the Armour electrical engineering department petitioned for membership in ETA KAPPA NU. On May 24, 1909, Delta Chapter of Armour Institute was chartered by ETA KAPPA NU fraternity. This chapter became the fourth branch of the fraternity. At present there are twenty-eight student chapters engaged in promoting engineering activities. These chapters are assisted by eleven alumni groups that give close attention to electrical engineering activities in the field.
