

The first meeting was held with the intention of forming committees so that the activities of the society could be as enthusiastically pursued this year as in previous years.

The annual smoker was held November 2, 1938, in the Electrical Lecture Room. The chief speaker of the evening was Dr. Reed, a new member of the electrical engineering department. The discussion was made interesting mainly because Dr. Reed related his own experiences in connection with the topic, "Generating Stations." The remainder of the evening was spent in a lighter vein, featuring a Monte Carlo party.

Row 1: Kotal, Strocchia, Quarnstrom, Chevalley, Freeman, Hebson, Ropek, Brewster, Kurtz, Osterberg.  
Row 2: Marik, Zarem, Kasper, Daniel, McCormack, Lorenzen, Bush, Terp, Gregory, Wooding.

At the third meeting of the society, Mr. H. T. Trenary, of General Electric, gave a very educational lecture on "Industrial Uses of X-Ray Equipment."

The rest of the semester was as successfully completed as it was so wholeheartedly started. It was constantly kept in mind to present to the members the best and most varied program possible.
