

I PRO 314: Final Report

All semester objectives were met and fulfilled. A final product, a complete working replica of the first artificial kidney, was presented to the Museum of Science and Industry on April 21, 2006. In addition to the replica schematics for future reference were also presented. As such, the project is deemed a success with the satisfaction of the client.

*A second replica will be completed prior to the beginning of the fall 2006 semester and will be presented to the Biomedical Engineering Department at the Illinois Institute of Technology.
