

INSIGHT

Anticipating the Future... Assessing the Impact

IPRO 341

Members: Ayo Ayodele, Saurabh Dass, Ankit Desai, Jason Frumkin, Jon Komyathy, Kevin Lerash, Jason Novak, Maggie Peterson, Bez Robinson, Sagar Shah, George Skontos, Mike Stohl, Andrew Wilk, Sungwoo Yang

Library Instruction: Jeanne Link

Faculty Advisor: Janet Woerner

Presentation Agenda

- Introduction
- Team Purpose/Hypothesis
- What is nanotechnology?
- Team Structure
- Applications
- Stakeholder Analysis
- Conclusions
- Q&A

Introduction

- Continuing from Fall 2005
- Nanotechnology
 - Why nanotechnology?
- Science is reaching the limitations of how small we can go...
- Unless....
- We start at the smallest element, the atom and molecule

Team purpose

- What is it?
- How it is used?
- What regulations if any?
- What information is already out there?
- What does the public know?

Hypothesis

- Hypothesis:
 - General public has the right to know opportunities and risks
 - Few sources of clear and unbiased information

What is nanotechnology?

- One billionth of a meter
- Mechanical, Electrical, and Chemical properties are different at the nanoscale

Foresight Institute:
--Virus Finders by Jeff Johnson

Potential Risks!

- Toxicity
- Nano-particles can enter our body
- No regulation
 - Privacy issues
 - Ethical issues

Team structure

- Applications research
 - Examples of how nanotechnology affects lives
- Stakeholders research
 - Examples of how much or how little is known about how these applications are affecting lives
 - What are the stakeholders telling people about this technology?
- Legal Perspective – Ad Hoc Law Student
 - It is an underlying issue in both categories

Consumer Goods

- Sporting Goods
 - Golf Balls
 - Tennis Balls
- Cosmetics
 - Skin cream
 - Suntan lotion
- Auto Wax
- Cloths
 - Eddie Bauer
 - Lee Jeans

http://www.eddiebauer.com/ebprod/ct.asp?cm_cg=T1&prodref_kl=22260

<http://www.eagleone.com/pages/products/category.asp?cid=5015>

http://www.smallfines.com/Images/cosmetics_lnk_kle_2.jpg

http://www.garriksportgroup.com/images/tennisballs/wilson_allcourt_200x250.jpg

Medical

- Drug Delivery Systems
- Diagnosis Systems
- Bandages

<http://www.utopiasilver.com/images/curad/curad2.jpg>

http://shasta.mpistuttgart.de/research/highlights/Highlight_DNACNT_files/image006.jpg

Military

- Stronger Weapons
- Personal Armor
- Vehicle plating
- Engine efficiency

--Office of Naval Research: Future Naval Capabilities

“The Future Force Warrior will be a Formidable Warrior in an Invincible Team, Able to See First, Understand First, Act First, and Finish Decisively.”

- US Army Natick Soldier Center:
Future Force Warrior Program

Electronics

- Molecular Electronics
 - Carbon nanotubes
 - Nanowires
- Power Systems
 - Electrochemical power systems
 - Nano-based batteries
- Circuit Components
 - Transistors
 - Diodes
 - Logic Gates
- Quantum Computing
 - Magnetic Random Access Memory (MRAM)
 - Read heads for optical drives

http://www.fz-juelich.de/iff/pics_pdfs/iff/elektronik_auf_mill1.jpg

Applications Conclusions

- New products offer more...
- BUT AT WHAT COST?
 - Potential Risks

www.foresight.org/nanomedicine/Gallery/Images/battle.jpg

Stakeholders Research

- Government
- Commercial
- Academic
- Independent

Criteria for Evaluation

- **What is it?**
- What type of domain is it?
- Who authored the site?
- **Are they credentialed and are their credentials listed?**
- What is the geography of the cyberspace?
- Is information current and updated in a timely fashion? Is it “dusty?”
- What do others say?
- Sources well documented?
- Links and/or references to other sites?
- **All viewpoints represented and bias if any?**
- What organizations link to it?
- Is the page rated well in directory?
- **Reason for web page: inform, explain, persuade, sell, ethics, share, advocate, and other**

- All criteria was compiled from:
 - University of California at Los Angeles. <http://www.library.ucla.edu/libraries/college/help/critical>
 - Johns Hopkins University. <http://www.jhu.edu/researchhelp/general/evaluating/>
 - University of California – Berkley. <http://www.lib.berkeley.edu/TeachingLib/>

National Nanotechnology Initiative (NNI)

- LINKS TO:
 - Rice
 - Cornell
 - MIT
 - Northwestern
 - NASA
 - National Science Foundation
 - Department of Defense
 - Department of Energy

ZYVEX

- LINKS TO:
 - The Center for Biological and Environmental Nanotechnology (CBEN)
 - MIT's Institute for Soldier Nanotechnologies
 - National Institute of Standards and Technology (NIST)
 - Gave Zyvex a \$25 million grant for the development of nano-assembly systems.

Other Sources

Perceptual map

Conclusions

- Each stakeholder has its own agenda to **promote and support**
- The information provided has a **bias on some level**
- Almost all funding could be traced back to **government money** (e.g. NNI) either directly or indirectly

Future of IPRO 341

- Create tool for public education
- Provide forum for public discourse
- Continue monitoring and evaluating nanotechnology

Special Thanks

- Dr. Friedman
- Beth Gore
- Dr. Peter Lykos
- Dr. Maritsa Poros
- Dr. Tillmans
- Dr. Vivian Weil
- O'Connor Design Works

Question and Answer

Team Members

- Ayo Ayodele Political Science
- Saurabh Dass Computer and Electrical Engineering
- Ankit Desai Molecular Biochemistry and Biophysics
- Jason Frumkin Computer Engineering
- Jonathan Komyathy Computer Science
- Kevin R. Lerash Political Science
- Jason Novak Chemical Engineering (JD candidate)
- Maggie Peterson Bio Medical Engineering
- Bezaleel I. Robinson Computer Engineering
- Sagar Shah Political Science
- George Skontos Applied Mathematics
- Michael B. Stohl Electrical Engineering
- Andrew J. Wilk Computer Engineering
- Sungwoo Yang Chemistry
