

# Church Energy Efficiency IPRO 328

Service Day 11-7-09  
Mount Carmel Baptist Church  
2976 S. Wabash

## MISSION

To lend our knowledge and resources to the cause of improving energy efficiency in churches [and deserving not-for-profit organizations] of the surrounding community

To provide an avenue for aspiring individuals to gain valuable job skills while simultaneously finding fellowship through volunteer efforts

To offer tools for learning more about environmental stewardship and energy efficient solutions through an interactive website

## Energy Corps

The Energy Corps is a group of volunteers consisting of IIT students that attend our training program and then implement the skills they learned in a neighborhood church on a Day of Service.

In the future, we hope that the Energy Corps will become self-sustaining and reach out into the community. Volunteers can be recruited from local high schools, churches and other community organizations.

Service Day 11-14-09  
Morningstar Baptist Church  
3993 S. Martin Luther King Dr.
