

OUR PRODUCT

3F

is worn as a standard paintball mask, allows its user to track objects which are all shown through a heads-up display. The Smart Specs display allows you to maintain your natural field of view, and you are provided with a real-time heads-up display of augmented reality. The information, displayed like an animated map overlay, places markers on the direction of your teammates. Following the markers will reunite you with your team. Smart Specs is the next generation of combat oriented GPS.

We have integrated eight technologies making 3F is the most advanced teammate recognition hardware to ever enter the paintball market. Utilizing GPS, WiFi, digital Compass, and accelerometer technologies 3F provides real-time teammate location updates.

HOW IT WORKS
