

## WHAT IS GREEN BUILDING?

*Green building is a design process that involves reaching the most sustainable outcome. The result is an increase in efficiency of a building's ability to use its given resources throughout its lifecycle. This comes about with the use of renewable resources and implementing systems to recycle wastes.*

*Each green building is evaluated and rated by Leadership in Energy and Environmental Design (LEED) and attempts to achieve the highest rating possible.*

## WHY CHOOSE GREEN BUILDING?

*Along with saving energy and it being good for the environment, green building also saves the building owner money. A sustainable design usually will have a more expensive initial cost, but soon after pays off with lowered operating costs.*

## Main Inside Heading

**Caption describing picture or graphic.**

The most important information is included here on the inside panels. Use these panels to introduce your organization and describe specific products or services. This text should be brief and should entice the reader to want to know more about the product or service.

You can use secondary headings to organize your text to make it

more scannable for the reader.
