- Level 89 - Condominium Floor
- Level 80 - Condominium Floor
- Level 71 - Condominium Floor
- Level 62 - Condominium Floor
- Level 53 - Condominium Floor
- Level 44 - Condominium Floor
- Level 35 - Condominium Floor
- Level 21 - Typical Service Apartment floor
- Level 5 - Typical Hotel Floor

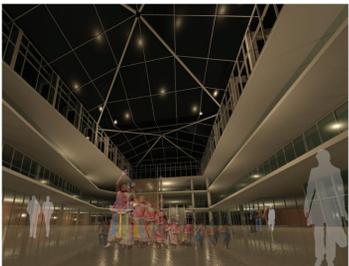

TERRACE APARTMENT

Tower facade has mesh screen that blocks the sunlight and allows natural Ventilation. Window screens are commonly found in traditional Indian architecture.

Each apartment can open and close the motorized screen. As the screens move the facade will have different look.

Center space in the Mall is multi-use and the space will be used for cultural performance, street theater, product launch and food festivals.

Flower garden is part of roof garden. Roof garden reflects the elements of Mughal gardens of India.
