

Developing Sustainable Communities Through Coffee

Objective

_ Help develop an economically sustainable coffee community

Goals

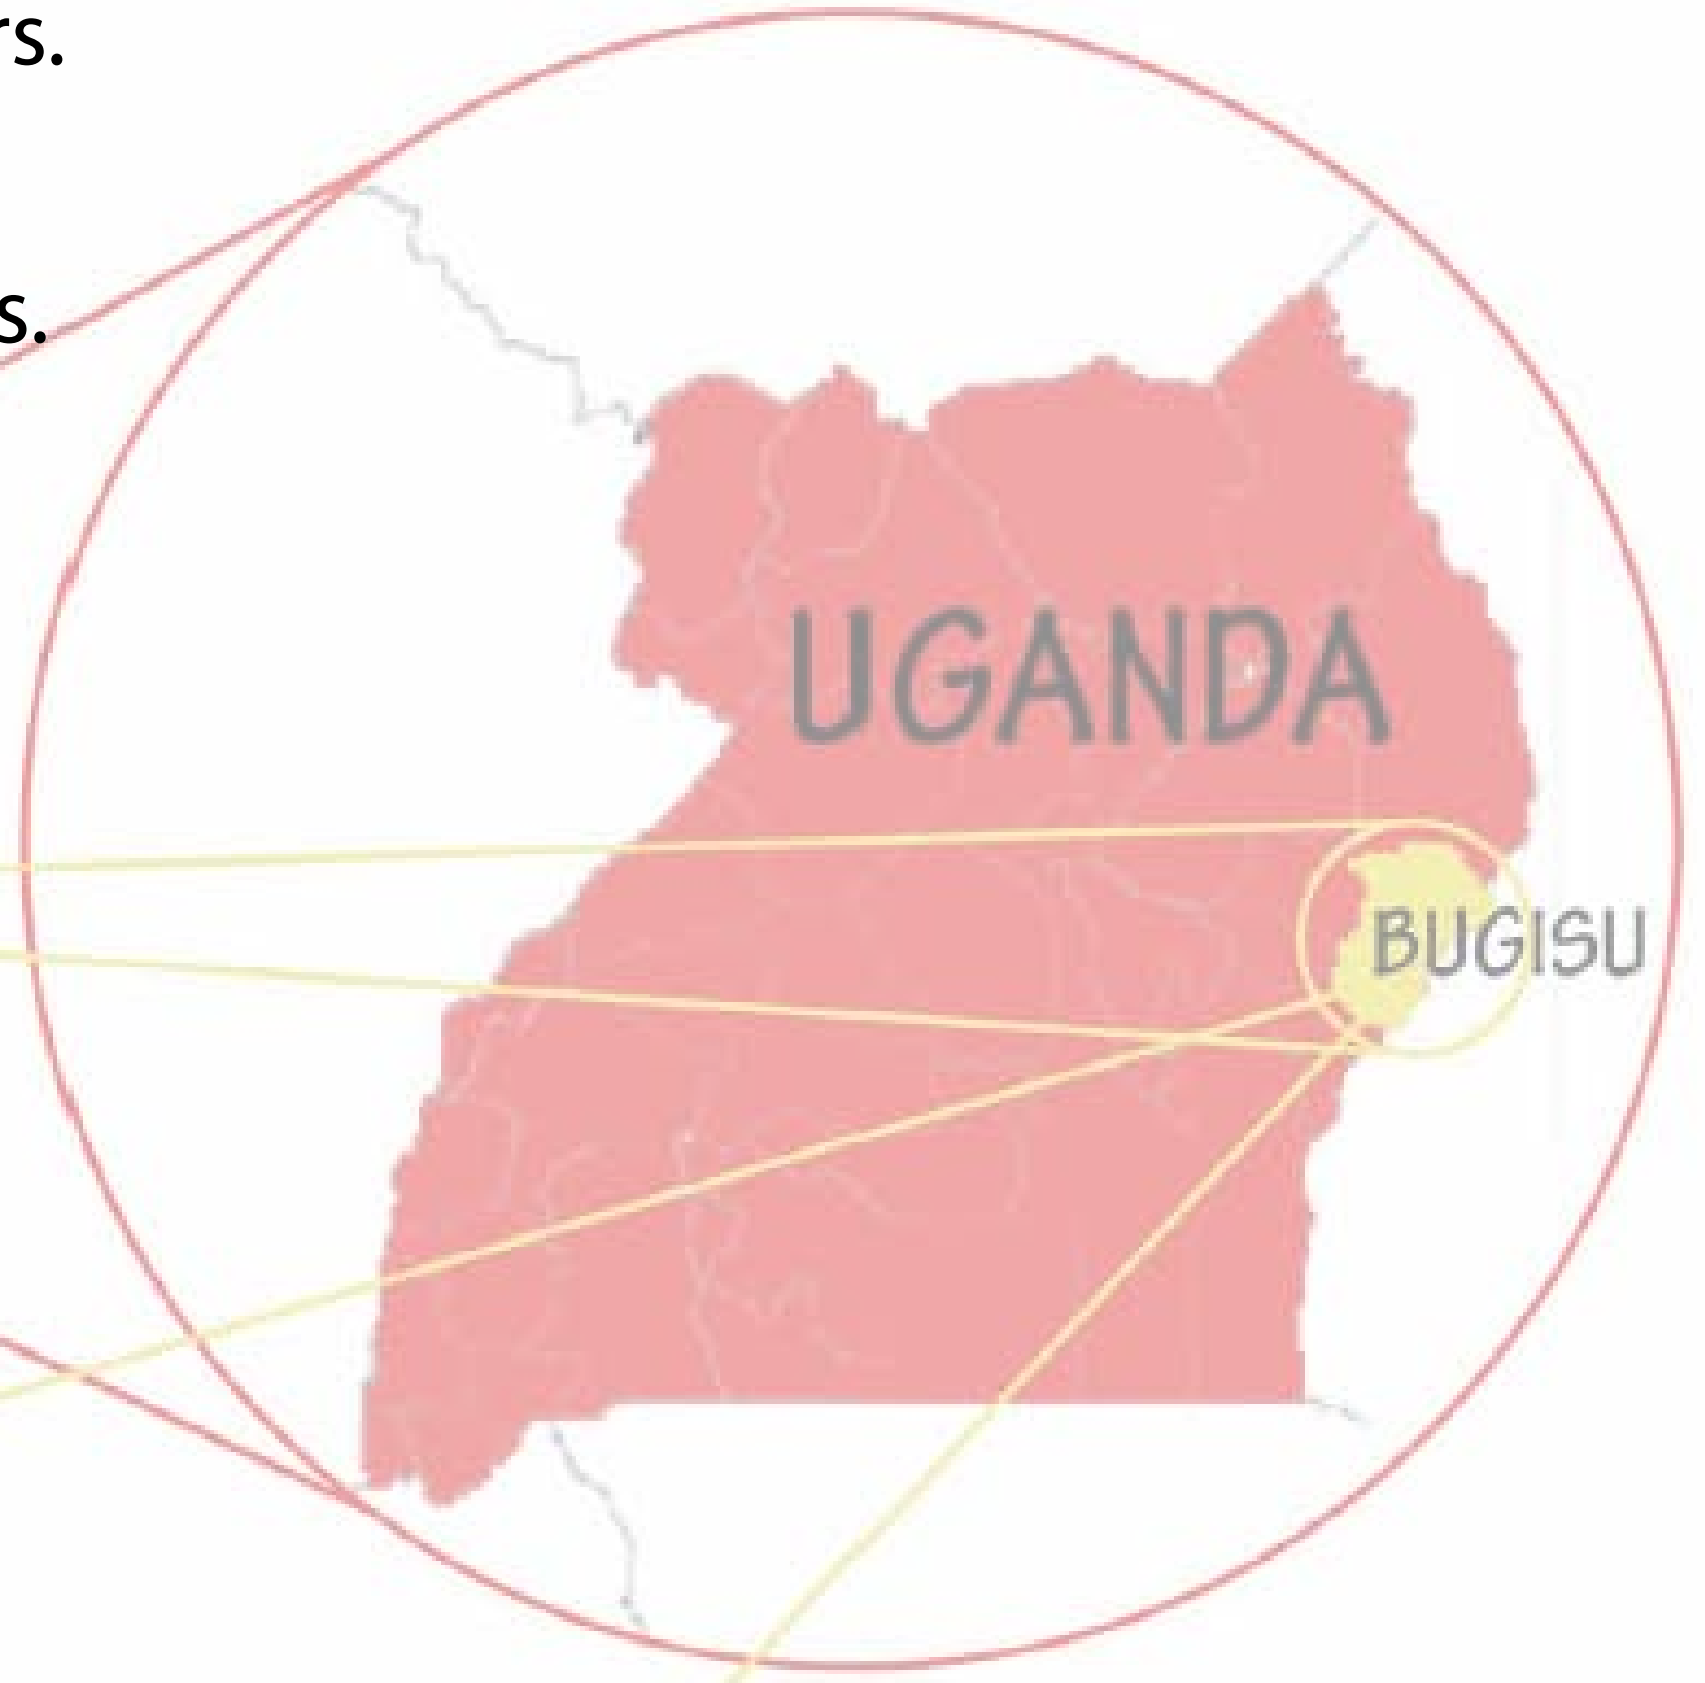

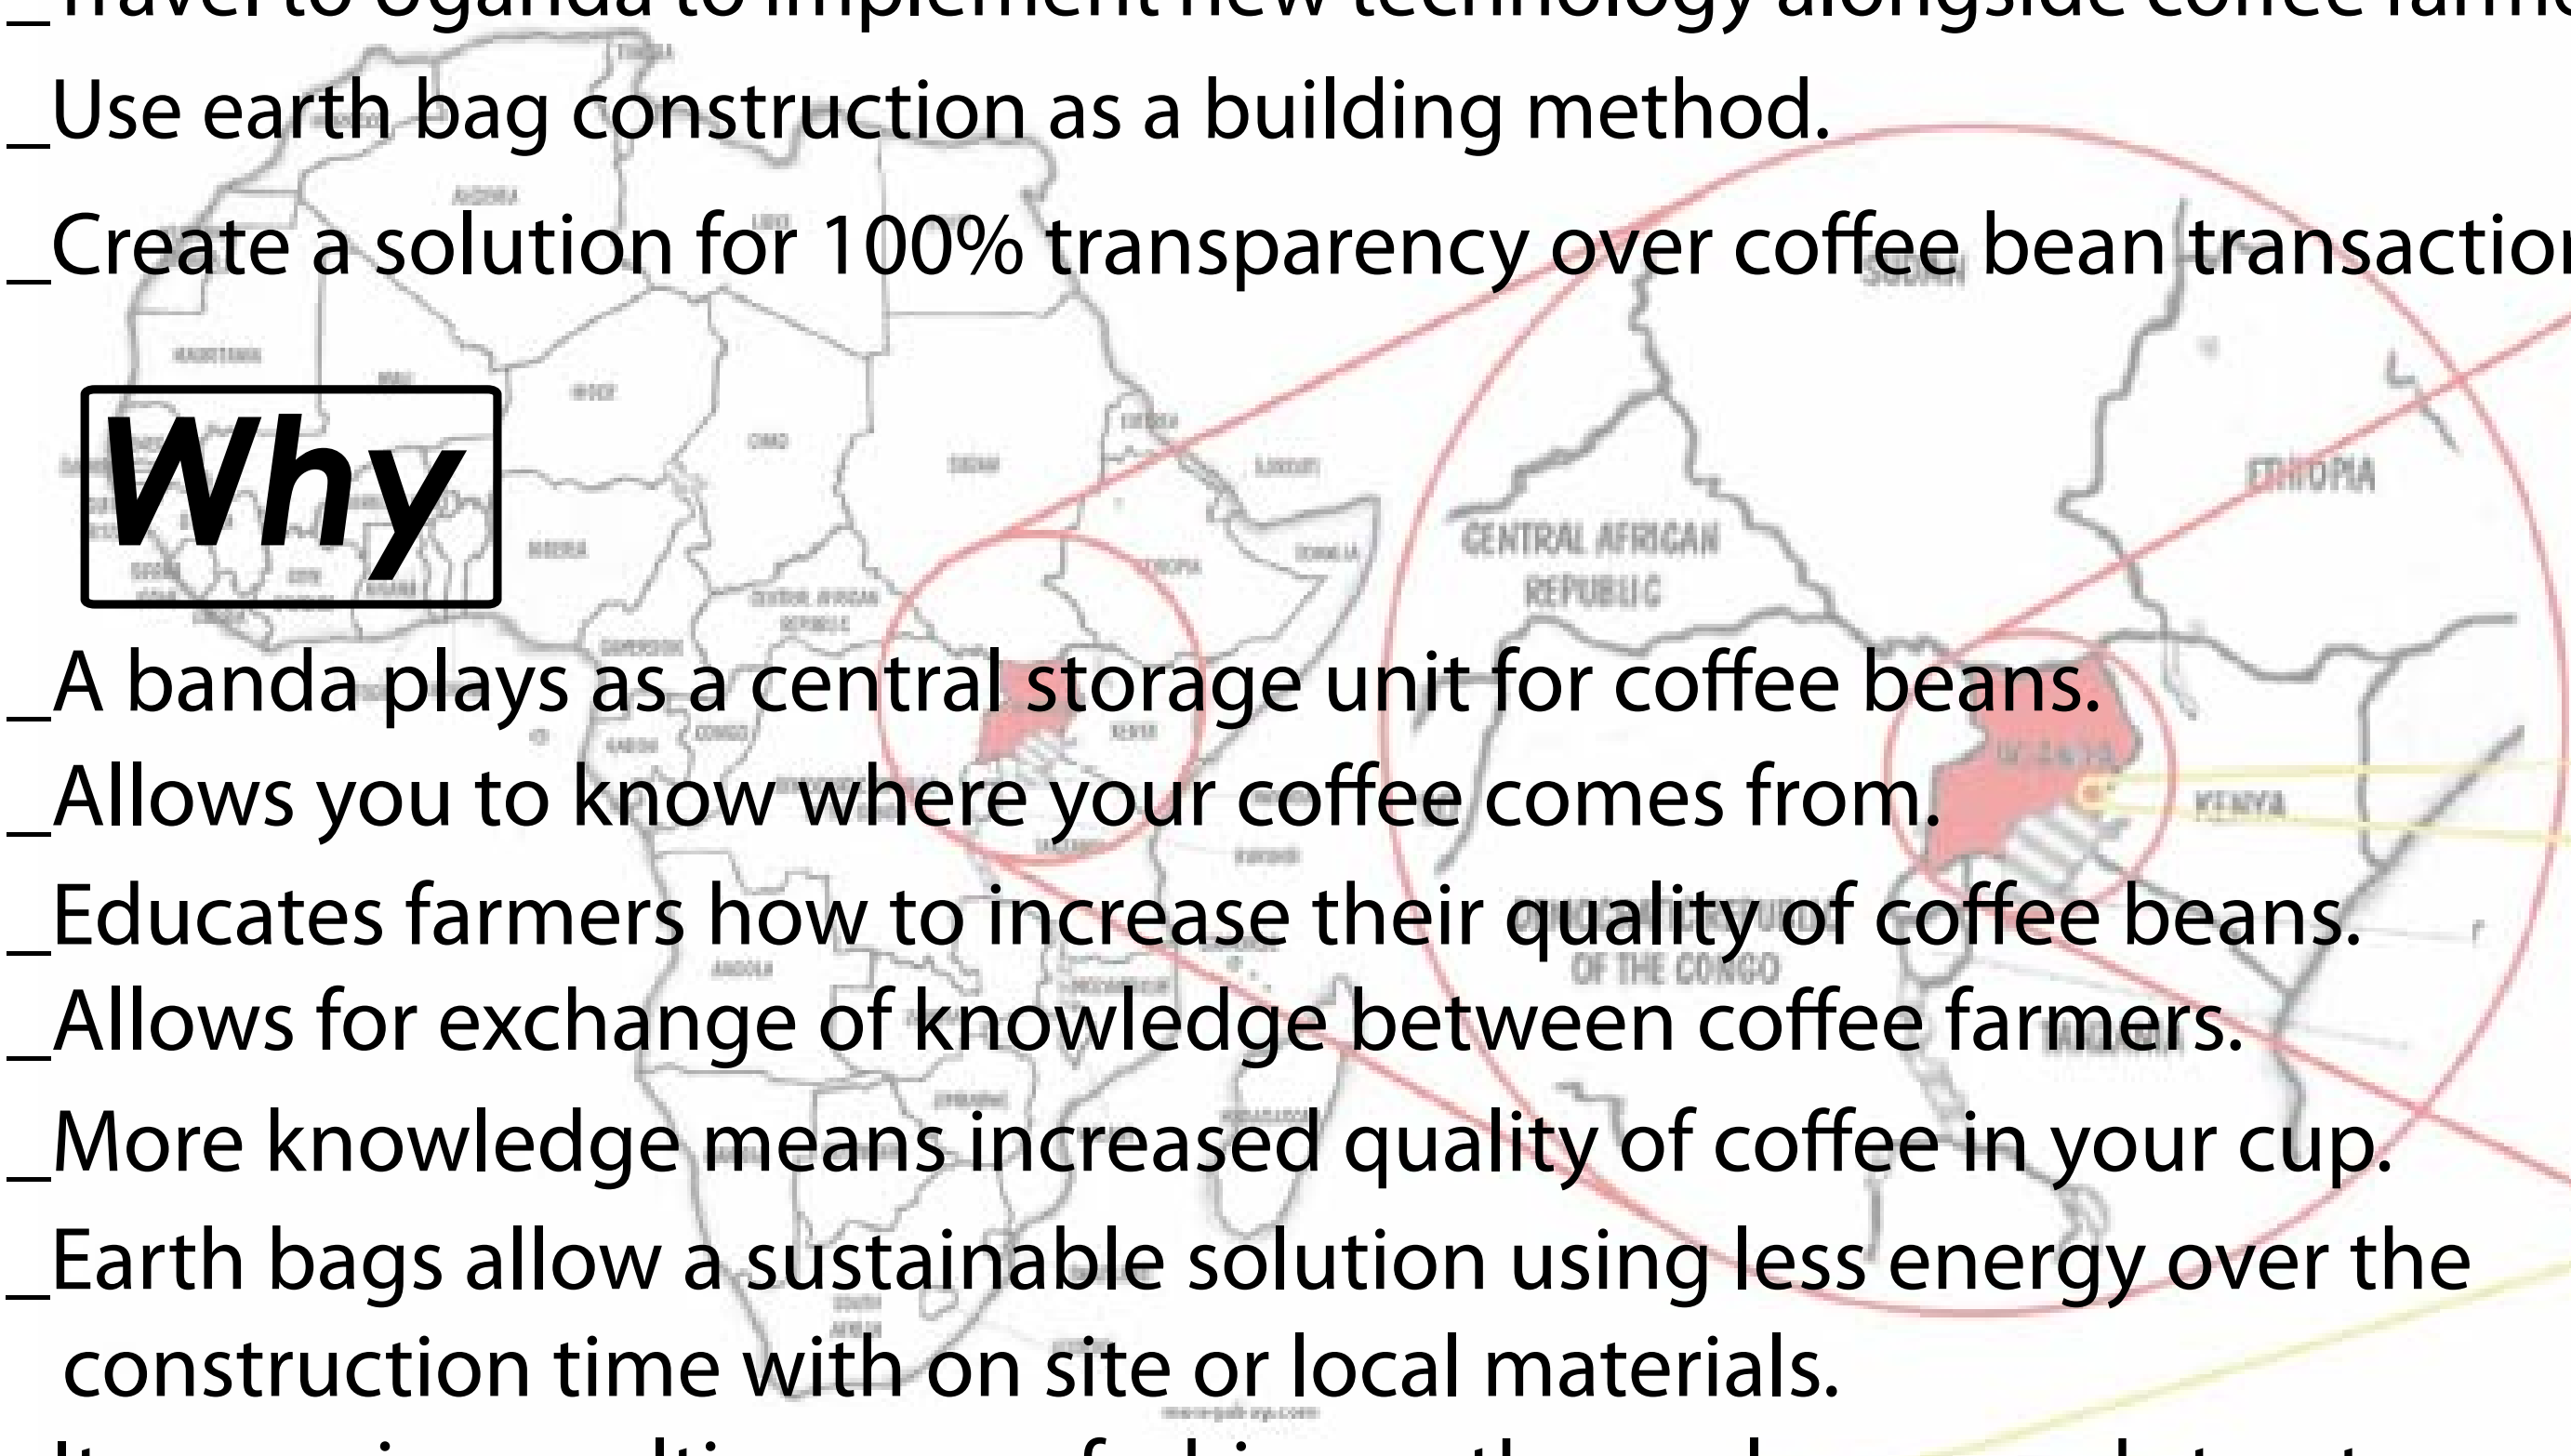

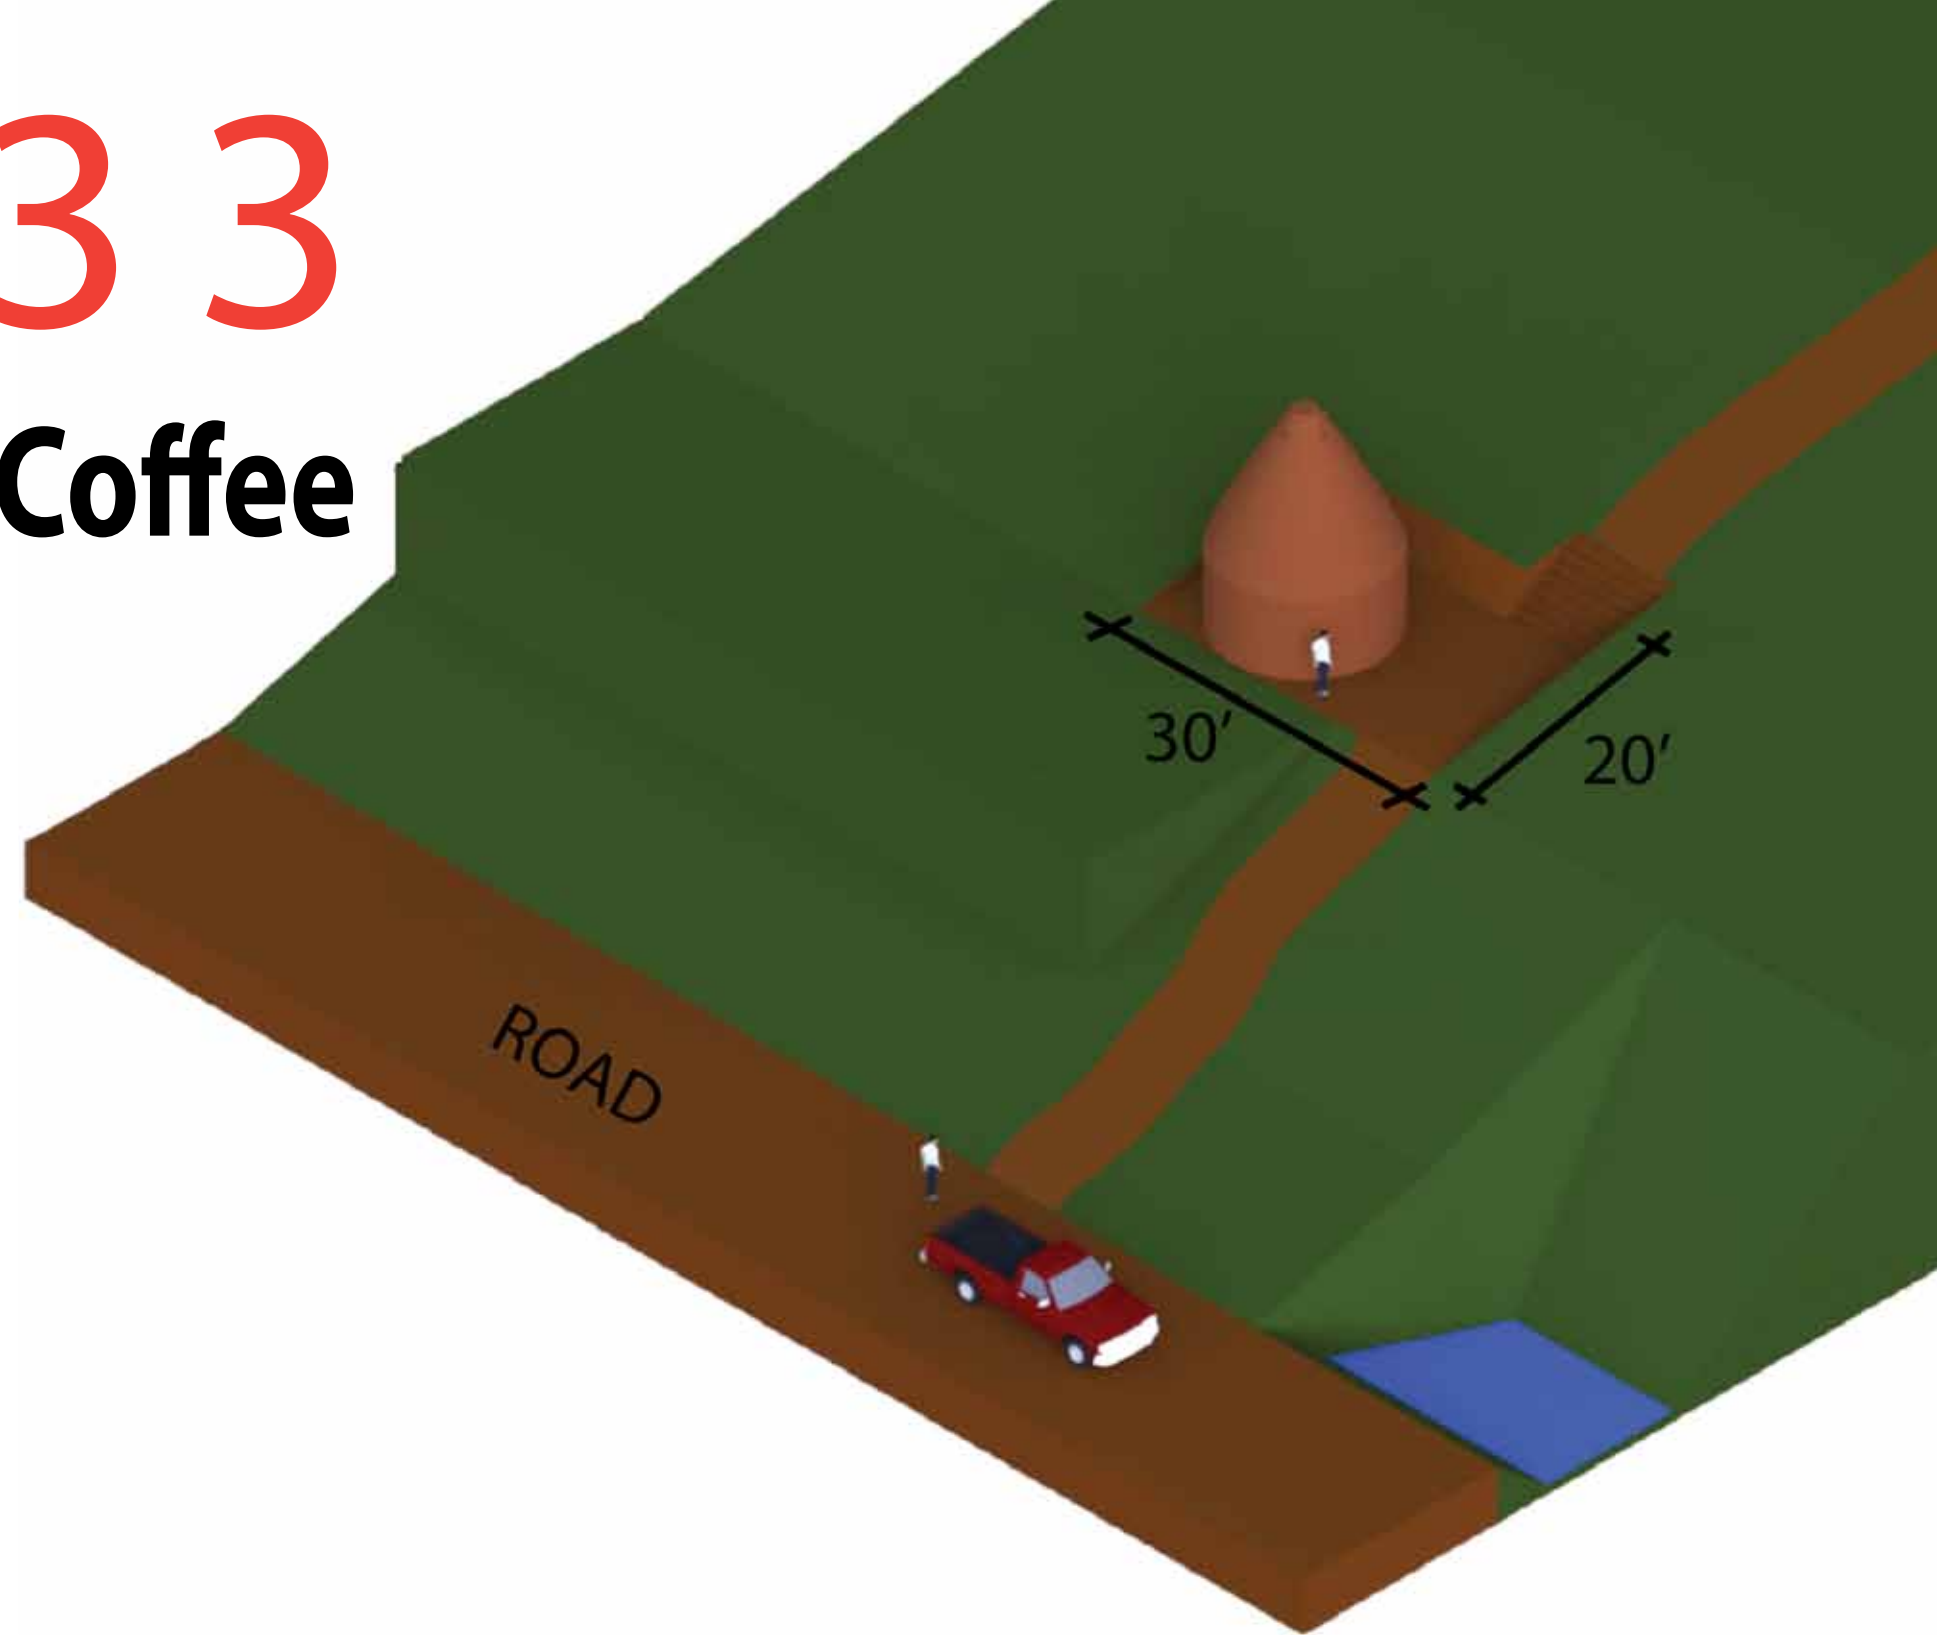

- _ Design and build a banda for coffee farmers in Uganda.
- _ Travel to Uganda to implement new technology alongside coffee farmers.
- _ Use earth bag construction as a building method.
- _ Create a solution for 100% transparency over coffee bean transactions.

Why

- _ A banda plays as a central storage unit for coffee beans.
- _ Allows you to know where your coffee comes from.
- _ Educates farmers how to increase their quality of coffee beans.
- _ Allows for exchange of knowledge between coffee farmers.
- _ More knowledge means increased quality of coffee in your cup.
- _ Earth bags allow a sustainable solution using less energy over the construction time with on site or local materials.
- _ It serves in a multi-purpose fashion as the enclosure and structure.

How

- _ Documentation on the earth bag construction process.
- _ Practicing the method for understanding of implementation logistics.
- _ Fundraising for student travel to Uganda.

Help us build the Banda
