

IPRO 318: ZooTech

Project Partner: Brookfield Zoo

Faculty: Professor Cindy and Dennis Hood

Project Manager: Taylor Dreher

Speakers: Kat Callas, Chinedu Azodoh, Jennifer

Puzewski

Team Members:

- Azodoh, Chinedu
- Blosky, Mitchell
- Callas, Kat
- Chiba, Mitsuru
- Dreher, Taylor
- Jeffcoat, Brooke
- Kobayashi, Jonathan

- Mis, Ashlie
- Pauley, Erica
- Perez De Tejada, Antonio
- Puzewski, Jennifer
- Rojas, Catalina
- Schneider, Erick

Problem

- Crowds
- Visibility
- Paper Map

The Solution

 Our goal: Produce an application for the iPhone to help enhance the Brookfield Zoo experience

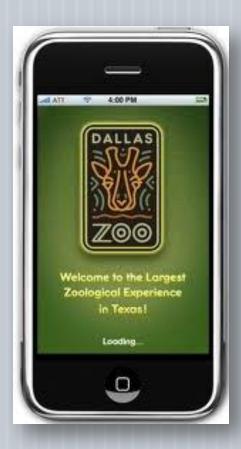

Other Zoo Applications

- Houston Zoo
- Detroit Zoo
- Woodland Park Zoo
- Cincinnati Zoo
- Dallas Zoo

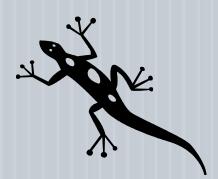

Previously...

- Built a Framework
- Develop a Guided Inquiry Process
- Field Test

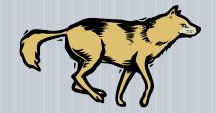

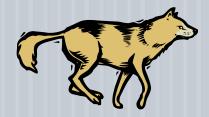

Organization and Approach

The Teams:

- Information Architecture Team
- Virtual Tour Team
- Software Development Team

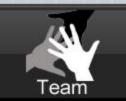

Cindy Hood

Project Manager

Taylor Dreher

Coding

Chinedu Azodoh Erick Schneider Antonio Perez De Tejada

Virtual Tour

Mitsuru Chiba Brooke Jeffcoat Jonathan Kobayashi Jennifer Puzewski Information Architecture

Mitchell Blosky Kathleen Callas Ashlie Mis Erica Pauley Diana Rojas

Project Partner

Brookfield Zoo

Information Architecture Team

Approach:

- Created and populated the animal database
- Gathered coordinates for GPS system.

Findings:

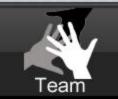

- Application can be a distraction for visitors at the zoo.
- Copyright of pictures when not from the zoo is an issue.
- Classifying animals by color is difficult for the guided inquiry

Accomplishments:

- Natural Flow
- Resolution
- Laid foundations for an audio tour

Virtual Tour Team

Approach:

- Performed usability tests with flow charts
- Maintained simplicity throughout the application.

Findings:

It is better to avoid custom buttons in the application.

Accomplishments:

- New features such as camera and map were added
- More detailed Animal info page: world map view, animal personal info
- Enabling the user listen to information on the animal page
- My Zoo feature: Enable user keep track of already seen animals
- Enabling user to print pictures of the animal.
- Enable sending animal tile via email.
- Events button

Software Dev Team

Approach:

- Reviewed the old code for the app
- Virtually redeveloped the code from scratch to implement the new design

Findings:

- Apple API is most complete and helpful for the needs of the project
- Stack overflow is a huge and dependable resource

Accomplishments:

- Successfully integrated database
- Implemented GPS on the map
- Finalized the design

Zoo Considerations

- My Zoo- "Collect" offensive
- Behaviorists- Personality Traits Not Applicable
- Identifying Animal by Number-Economical Solution

Ethical and Societal Considerations

- Privacy Concerns
 - User Agreement
 - Zoo Information
- Societal
 - Aid Staff/Volunteers
- Not Staring at phone- Personal Virtual Tour Guide

Technical Considerations

- Expanding to fit iPhone 4
- Keeping functions natural to iPhone users
- Upkeep -New birthdays, Events
- Good documentation
 - Photoshop
- Usability tests
- Will zoo provide devices for visitors
- Animals traveling from different exhibits

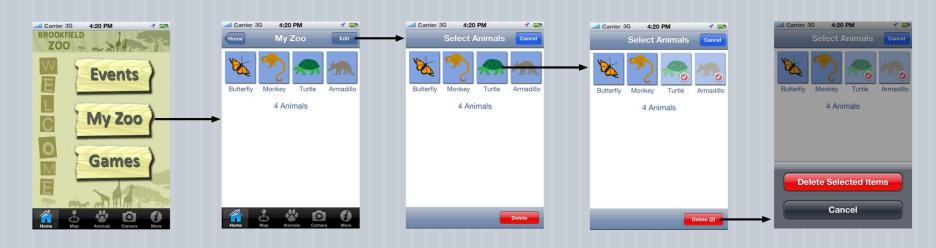

Conclusion

- Connection to Animal
- Educate Users on Conservation Efforts
- Virtual Tour Guide- Personal Tour Guide- Audio
- Aid Zoo Staff With Commonly Asked Questions
- Structure of Application-Flow
- Great Skeleton for Future Development

Future Work

- Good Documentation
- Have All Animals Within Database
- Further Map Features
 - Cartoon Overlay
- Design
 - Backgrounds, Buttons
- My Zoo
- Field Testing
- More Games, Engaging, and Educational Features
- Other Platforms
- Become An Example For Other Zoo Application Designs

Coming To The App Store Soon... Thank you©
