Introduction

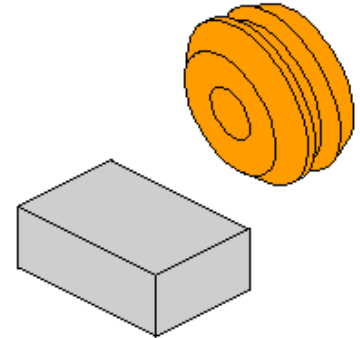

IPRO 347

&

ABRASIVE-FORM INC.

- Abrasive-Form is a multimillion-dollar contract manufacturer specializing in **creep-feed grinding**
- Principal customers are the industrial Gas Turbine and the Aerospace industry
- Company has been growing since 1976

[Problem Statement]

- **Keeping track** of the customer projects with folders
- Growing company => Problems with **information management**
- Company has a **hard time finding** the information
- **Time** consuming and takes a lot of **space**

[Goals of this IPRO]

- Using state of the art software to propose a customized online **storage system** :
 - **Efficient** solution
 - Minimum **cost**
 - **Very Simple to use**
- Reducing time spent and space used
- Broadcast the information to all the employees

[Follow up of the summer IPRO]

- Software chose : **Microsoft Sharepoint**
- First customization is already done
- Some customer requirements are still not fulfilled
- Implementation of the software in the company has to be done

[Current Progress]

- Summer IPRO work has been fully understood
- Company Visit : future goals discussed and approved by sponsor
- Trial Server obtained

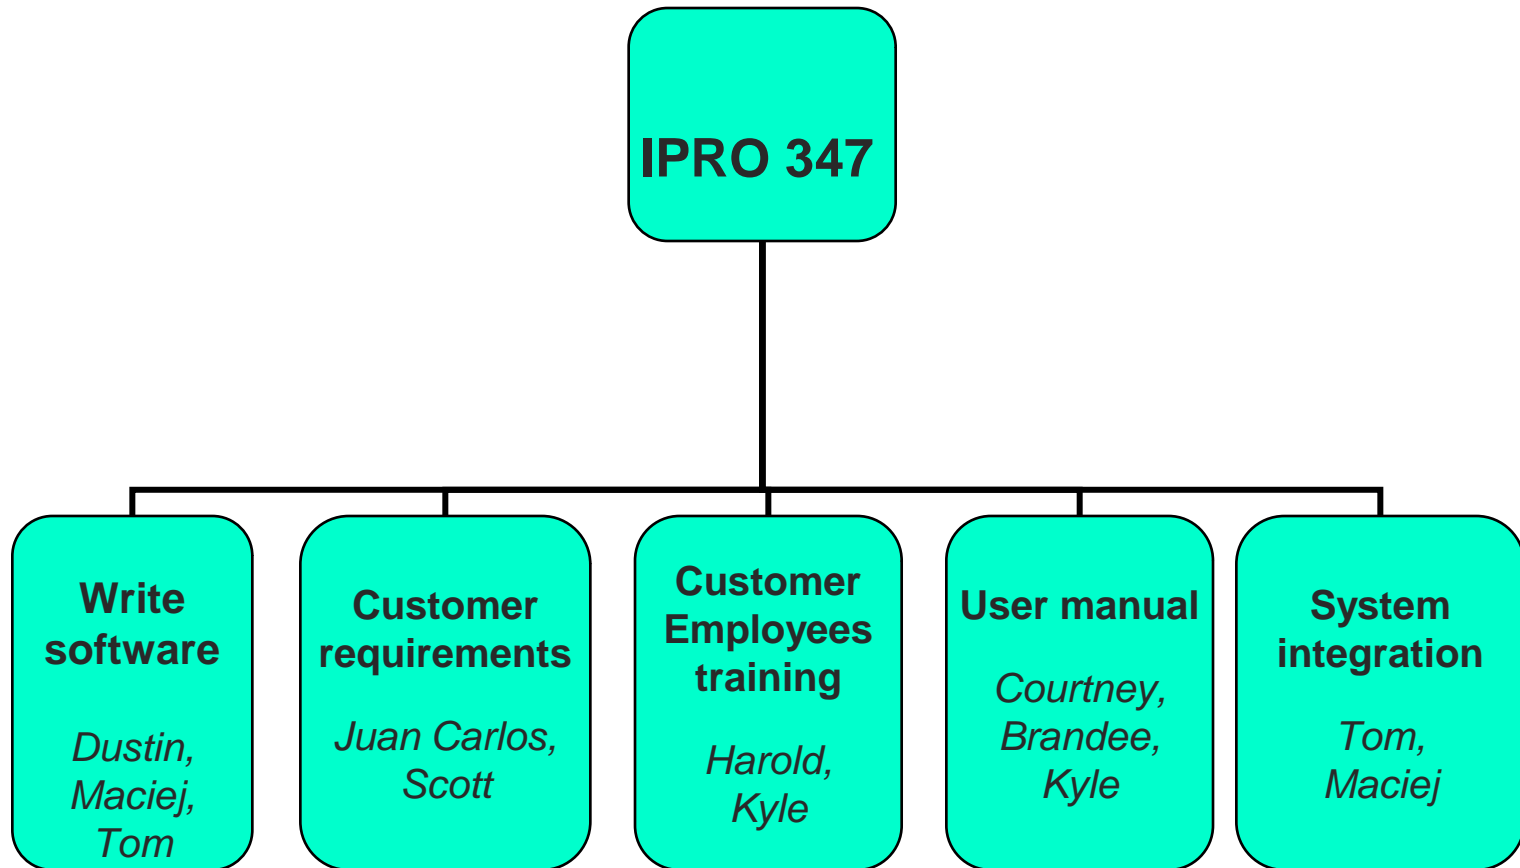

[Punch List]

- Remote Access
- Offsite Backup
- Search Engine (Not fully functional)
- Quality Tracking
- Quality Tracking of Personnel
- Alarms if documents are modified

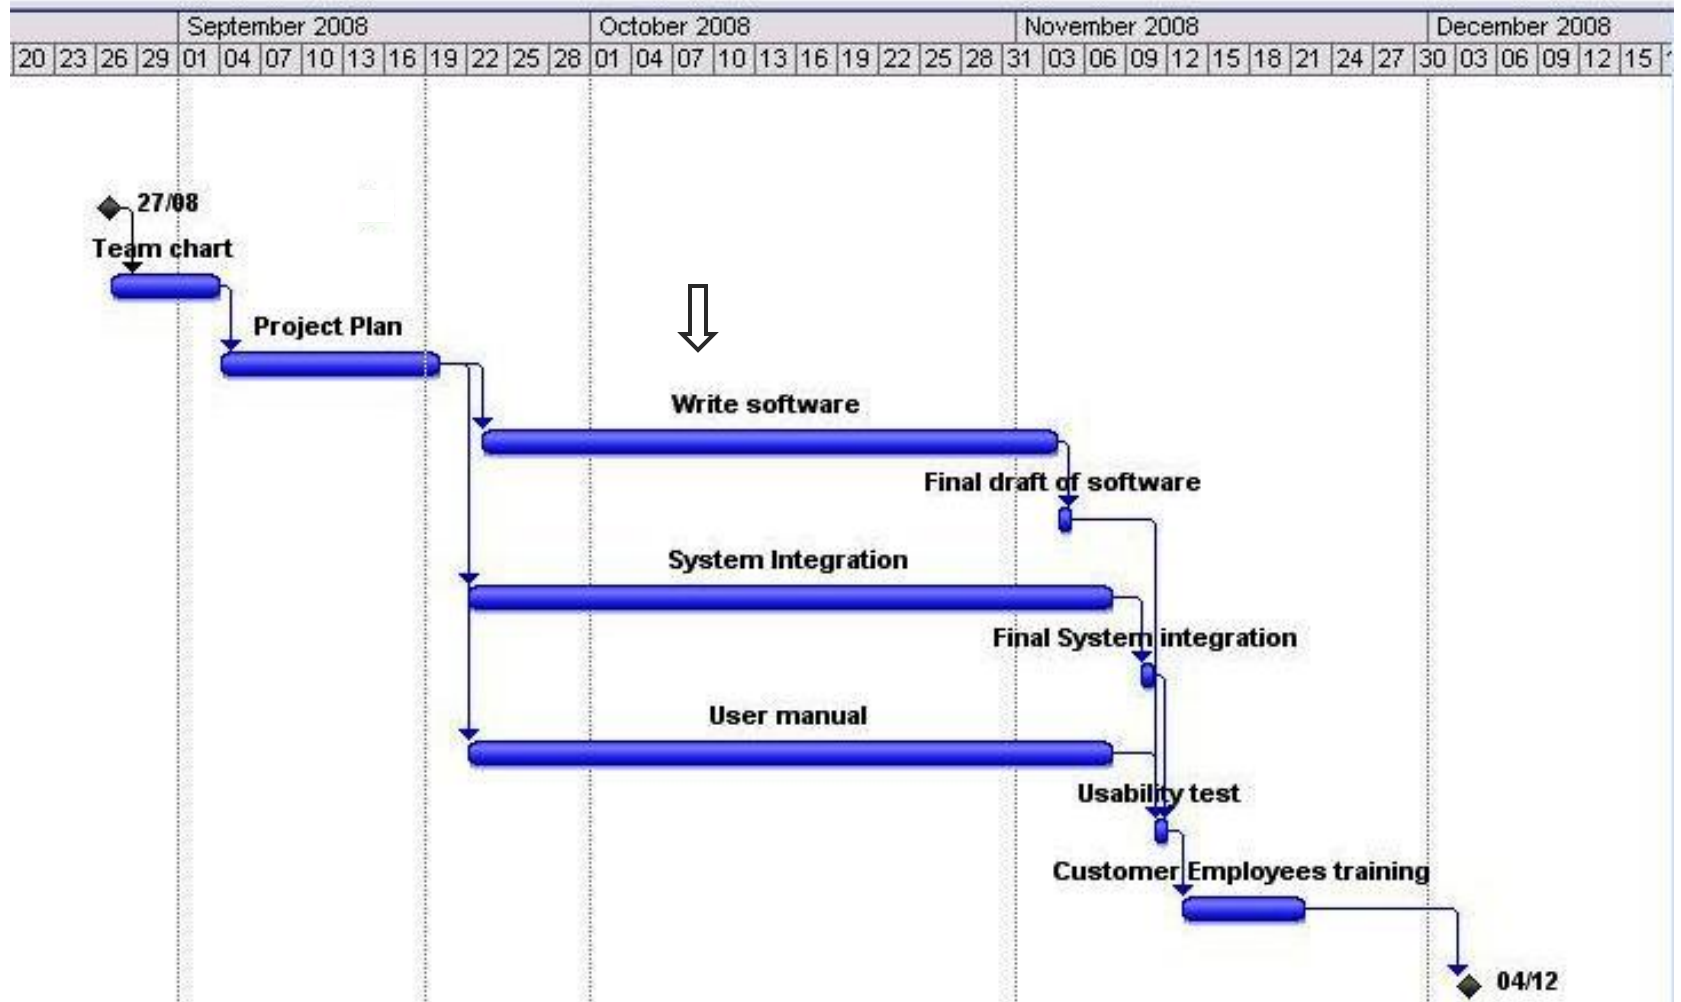

[Fall IPRO Objectives]

- Punch List
- Testing Software from IIT Server
- Implementation
 - 1 Meeting for software integration
 - Meetings for employee training
 - User Manuals distributed

[Team Organization]

[Project Plan]

[Obstacles]

- Contact with consultant
- Access to the IPRO summer code
- Server setup

[Thank you for your attention!]
