

Welcome

Mobile technology platforms are increasingly being adopted by companies to enhance employee productivity. The goal of this IPRO is to evaluate how Tellabs can benefit from these emerging mobile devices and applications.

Objectives

- Identify employee user groups
- Identify user group needs
- Research devices, GUI(s), applications that suit user-group needs
- Research security risks
- Recommend security solutions
- Develop prototype

Below: Access to manuals and documents

Opportunities

- Sync documents
- Upload pictures
- Barcode scanning
- Expense Reporting
- Training via mobile devices
- Transaction approvals via mobile devices

Going Forward

- Investigate GUI and application implementations
- Draft security policies
- Recommend security enabling technologies
- Develop prototypes
- Conduct user testing
