"Any, any, any."

To create an app where **any** employee can use it on **any** device at **any** time.

RESULTS

- Interviews with employees from varying positions
- Identified immediate needs
  - Uploading work site pictures
  - Inventory on equipment with bar codes
 - Streamline process for technicians to access site-related documents
- Other needs
  - Current VPN security authentication
  - Sales approval process
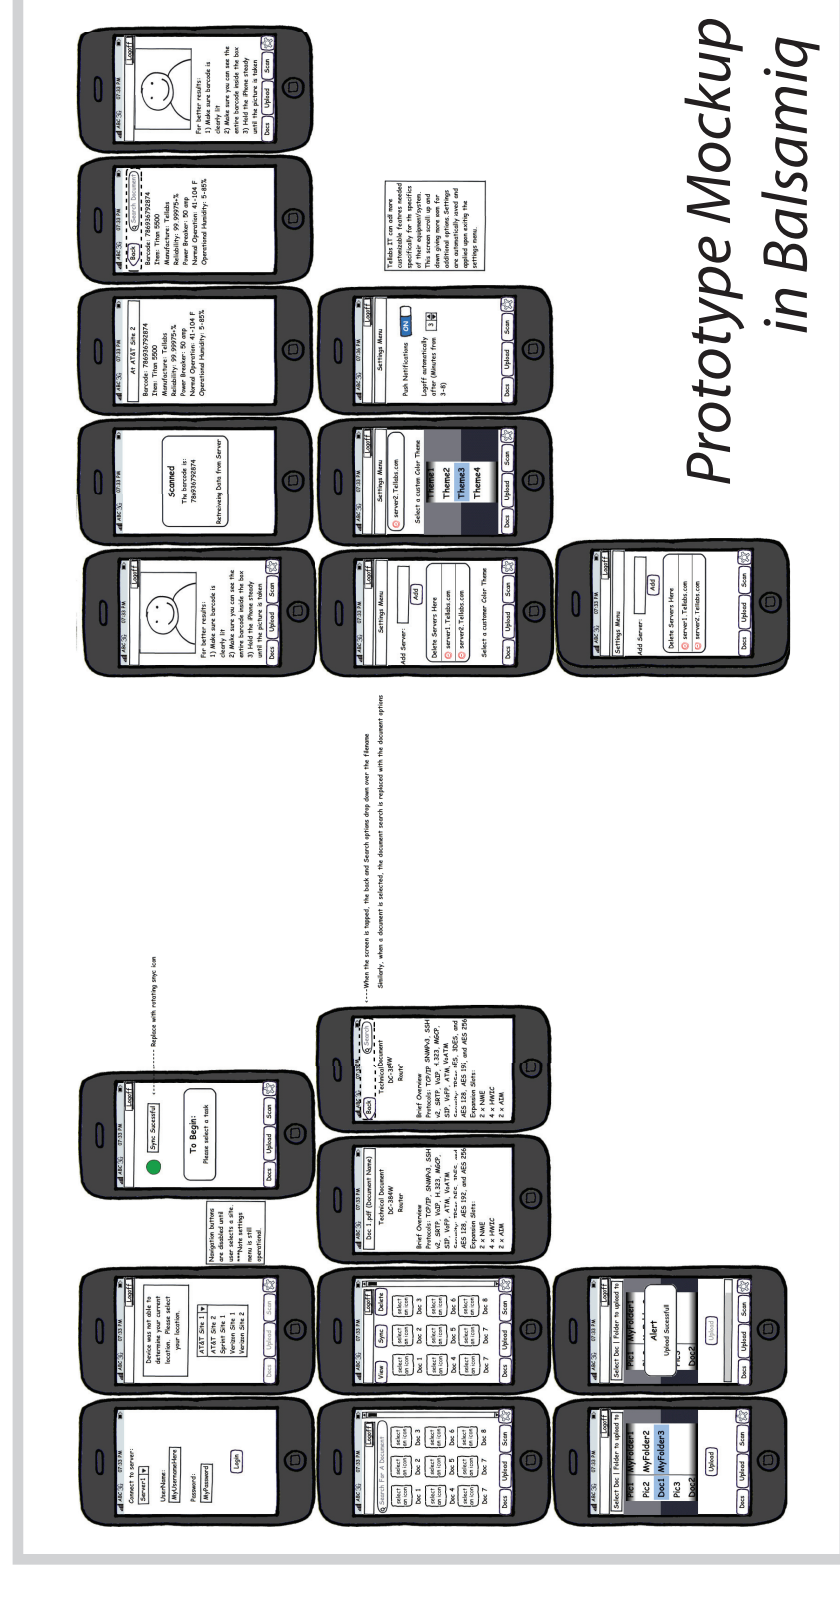

CONCLUSIONS

- **OnSite App**
  - Upload pictures with a tap
  - Scan inventory bar codes
  - Provide immediate access to site-related documents
