

## Site Surveying

- Surveying of current community development to calculate living space for tax purposes.
- Based on this survey, provided recommendations for lot lines for future expansion of individual cottages.

## Capstone

- Responsible for the engineering of the bridge design and road conditions.
- Conducted research into all applicable codes for the project. Coordinated with architects on bridge design.

## Bridge Design

- Aesthetic design of a replacement bridge at the entrance of the course.
- Landscaping plan for the area surrounding the bridge.
